INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital appreciation.

Focus on technology companies with:

- Potential for real earnings and revenue growth
- Leading or growing market share

Management interviews—first-hand analysis can help ensure that the most promising fund candidates are selected.

BENEFITS AND RISKS

Above-average growth potential of technology companies on the brink of technological advancement.

Potential volatility inherent in an industry:

- That is highly competitive
- Where companies that fall short of expectations are often treated harshly by investors

Technology stocks, historically, have experienced unusually large price swings, both up and down. The stocks in which this fund is actively managed and invests face special risks, such as their products or services not proving commercially successful or becoming obsolete quickly.
