PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value of an investment will fluctuate; therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Visit timothyplan.com for the most recent month-end performance.

The Russell 2000 Index tracks the performance of 2,000 of the smallest U.S. companies, based on market capitalization. The Index assumes reinvestment of all dividends and distributions and does not reflect any asset-based charges for investment management or other expenses. It is not possible to invest directly in an index.

The illustration is based on a hypothetical \$10,000 investment in A Class shares. All results shown assume reinvestment of dividends and capital gains. The maximum sales load on Class A shares is 5.5%; the maximum CDSC on Class C shares is 1%; Class I shares are no load shares which are available exclusively through registered investment advisors or for institutional accounts.

Objective

The investment objective of this Fund is to provide you with long-term growth of capital, with a secondary objective of current income.

Strategy

- The Fund seeks to achieve its investment objective by primarily investing at least 80% of the Fund's total assets in U.S. stocks with market capitalizations that fall within the range of companies included in the Russell 2000 Index (the "Index").
- In determining whether to invest in a particular company, the Fund's Investment Manager focuses on a number of different attributes of the company, including the company's market expertise, balance sheet, improving return on equity, price to earnings ratios, industry position and strength, management, and a number of other factors.
- The Fund may invest in equity securities of foreign issuers in the form of American Depository Receipts (ADRs).

Fund Risk

Investing in smaller companies may result in greater risks than investing in larger companies for various reasons including, but not limited to, increased volatility, lower trade volume and possibly having less competitive strengths than larger companies. Investing in value stocks may result in performance that is less than the market as a whole, and value stocks may take a long time or never appreciate as anticipated.

PLEASE SEE THE FUND PROSPECTUS FOR A COMPLETE EXPLANATION OF THE RISKS INVOLVED WITH EACH FUND. Risk chart is for illustrative purposes only.
