

MainStay Cushing[®] MLP Premier Fund

A: CSHAX | C: CSHCX | I: CSHZX

All data as of 06/30/22

Investing across the energy supply chain

Seeks: Current income and capital appreciation. In seeking current income, the Fund intends to pay current cash distributions to shareholders, regardless of the character of such distributions for tax or accounting purposes.

Morningstar Category: Energy Limited Partnership

Benchmark: Alerian Midstream Energy Select Index

Energy investing specialists

Cushing Asset Management is an independently owned investment advisory firm founded in 2003 that specializes in energy-related investments.

Midstream energy

The Fund invests in midstream energy companies and MLPs to provide income and growth potential.

Dynamic investment process

Cushing's "bottom-up" fundamental research provides flexibility to adapt to changing market conditions while managing risk.

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. No initial sales charge applies on investments of \$1 million or more (and certain other qualified purchases). However, a contingent deferred sales charge of 1.00% may be imposed on certain redemptions made within 18 months of the date of purchase on shares that were purchased without an initial sales charge. Visit www.newyorklifeinvestments.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

The Fund is a non-diversified, open-end management investment company under the Investment Company Act of 1940, as amended. A non-diversified fund may have a significant portion of its investments in a smaller number of issuers than a diversified fund. Having a larger percentage of assets in a smaller number of issuers makes a non-diversified fund, like the Fund, more susceptible to the risk that one single event or occurrence can have a significant adverse impact upon the Fund. There are currently approximately 120 publicly traded MLPs. The Fund will select its investments in MLPs from this small pool of issuers, together with securities issued by any newly public MLPs, and may invest in securities of private MLPs, affiliates of MLPs, and non-MLP issuers, consistent with its investment objective and policies. An investment in the Fund may present greater risk to an investor than an investment in a diversified portfolio because changes in the financial condition or market assessment of a single issuer may cause greater fluctuations in the value of the Fund's shares. The Fund concentrates its investments in the natural resources, industry, including MLP's operating in such industry. MLPs and other natural resources sector companies are subject to certain risks, including, but not limited to the following: fluctuations in the prices of commodities; the highly cyclical nature of the natural resources sector may adversely affect the earnings or operating cash flows of the issuers in which the Fund will invest; a significant decrease in the production of energy commodities would reduce the revenue, operating income, and operating cash flows of MLPs.

Because of the Fund's concentration in MLPs, it has historically not been eligible to elect to be treated as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"). However, beginning with the tax year which runs from December 1, 2020 through November 30, 2021, the Fund intends to invest in a manner consistent with, and otherwise comply with, the requirements to allow it to elect to be treated as a RIC, thereby avoiding taxation as a C-corporation under the Internal Revenue Code. As a RIC beginning with the tax year which runs from December 1, 2020 through November 30, 2021, the Fund generally will not pay corporate-level federal income taxes on any ordinary income or capital gains that is distributed to shareholders as dividends. While unlikely, the Fund may be required to pay corporate-level federal income taxes on gains built into its assets under certain circumstances.

To obtain and maintain the federal income tax benefits of RIC status, the Fund must meet specified source-of-income and asset diversification requirements and distribute annually an amount equal to at least 90% of the sum of net ordinary income and realized net short-term capital gains in excess of realized net long-term capital losses, if any, out of assets legally available for distribution. In accordance with the tax requirements applicable to a RIC, the Fund will, beginning with February 28, 2021, the end of the first quarter of its first taxable year as a RIC, and as of the end of each quarter of its taxable year going forward, invest no more than 25% of the value of its total assets in the securities of MLPs and other entities treated as qualified publicly traded partnerships, which are treated as partnerships for U.S. federal income tax purposes and are defined more specifically in the provisions applicable to RICs. The investment strategies, practices, and risk analysis used by the Subadvisor may not produce the desired results.

Tax Information

The Fund's distributions are generally taxable to you as ordinary income, capital gains, or a combination of the two, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. The Fund as indicated above, intends to qualify as a regulated investment company for federal income tax purposes, beginning with the tax year which runs from December 1, 2020 through November 30, 2021. If the Fund did not so qualify, the Fund could incur a tax liability and would not be eligible to pay capital gain distributions.

1. Average annual total returns include the change in share price and reinvestment of dividends and capital gain distributions. Effective after the close of business 7/11/14, Cushing[®] MLP Premier Fund was renamed MainStay Cushing MLP Premier Fund. Performance for Class A and I shares reflect the performance of the then-existing Class A and I shares of Cushing MLP Premier Fund (which was subject to a different fee structure) for periods prior to 7/11/14, restated to reflect current sales charges. Unadjusted, the performance of the new class would likely have been different. Class I shares are generally only available to corporate and institutional investors. **2.** The Alerian Midstream Energy Select Index is a broad-based composite of North American energy infrastructure companies. The Alerian Midstream Energy Select Index is a capped, float-adjusted, capitalization-weighted index, whose constituents earn the majority of their cash flow from midstream activities involving energy commodities. The Fund has selected a tiered benchmark as its secondary benchmark. The returns for the tiered benchmark represent the returns of the Alerian MLP Index prior to December 1, 2020 and the returns of the Alerian Midstream Energy Select Index thereafter. Index results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index. **3. Standard deviation** measures how widely dispersed a fund's returns have been over a specified period of time. A high standard deviation indicates that the range is wide, implying greater potential for volatility. **Beta** is a measure of historical volatility relative to an appropriate index (benchmark) based on its investment objective. A beta greater than 1.00 indicates volatility greater than the benchmark's. **R-Squared** measures the percentage of a fund's movements that result from movements in the index. The **Sharpe Ratio** shown is calculated for the past 36-month period by dividing annualized excess returns by annualized standard deviation. The **Annual Turnover Rate** is as of the most recent annual shareholder report.
