Investment Strategy

The U.S. Managed Volatility Fund, (the "Fund") is a collective trust that seeks capital appreciation with less volatility than the broad U.S. equity markets. The Fund will invest 80% of its assets in securities of U.S. companies of all capitalization ranges. These securities may include common stocks, preferred stocks, ETFs, warrants, equity options and related equity-based derivative instruments, such as futures, options on futures, and swap agreements and engage in short sales.

Collective Investment Trusts

SEI Trust Company (the "Trustee") serves as the Trustee of the Fund and maintains ultimate fiduciary authority over the management of, and the investments made, in the Fund. The Fund is part of a Collective Investment Trust (the "Trust") operated by the Trustee. The SEI Core Strategies Collective Trust is a trust for the collective investment of assets of participating tax qualified pension and profit sharing plans and related trusts, and governmental plans as more fully described in the Declaration of Trust. The SEI Core Strategies Collective Trust is managed by SEI Trust Company, the Trustee, based on the investment advice of SEI Investments Management Corporation, the investment adviser to the Trust. As a bank collective trust, the SEI Core Strategies Collective Trust is exempt from registration as an investment company.

Calendar Year Returns (%)

	2021	2020	2019	2018	2017	2016	2015	2014
SEI U.S. Managed Volatility (CT 1)	19.97	-2.18	23.56	-2.53				

Past performance does not guarantee future results. Current performance may be higher or lower. The principal value and investment return of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original value.

To determine if the Fund is an appropriate investment for you, carefully consider the investment objectives, risk factors and charges and expenses before investing. This and other information can be found in the Fund's Declaration of Trust. Read the Declaration of Trust carefully before investing.

Risk Information

There are risks involved with investing including loss of principal. There is no assurance that the objectives of any strategy or fund will be achieved or will be successful. No investment strategy, including diversification, can protect against market risk or loss. Holdings subject to change.

Current and future portfolio holdings are subject to risk. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. In addition to the normal risks associated with investing, investments in smaller companies typically exhibit higher volatility.

Glossary & Disclosures

Beta: Quantitative measure of the Fund's volatility relative to the benchmark used. A beta above 1 indicates the fund is more volatile than the overall market, while a beta below 1 indicates the fund is less volatile.

Price to Book Ratio: The most recent price of a security divided by the company's annual fiscal year basis book value per share. Preliminary book value per share figures are used when available otherwise the book value per share is from the most recent fully reported financials. When the denominator is negative, the output is suppressed.

Price to earnings ratio: The most recent price of a security divided by the company's annual fiscal year basis earnings per share. Preliminary earnings per share values are used when available otherwise the earnings per share is from the most recent fully reported financials. When the denominator is negative, the output is suppressed.

Standard Deviation (Absolute): Used to describe historical volatility, a statistical measure of the distance a quantity is likely to lie from its average value. It is applied to the annual rate of return of an investment, to measure the investment's volatility (risk). Standard Deviation is synonymous with volatility, in that the greater the standard deviation the more volatile an investment's return will be. A standard deviation of zero would mean an investment has a return rate that never varies.

Tracking error: The measure of the risk of the portfolio relative to the benchmark.

Weighted Capitalization: The market price of an entire company, calculated by multiplying the number of shares outstanding by the price per share.

For those SEI products which employ a multi-manager structure, SIMC is responsible for overseeing the sub-advisers and recommending their hiring, termination, and replacement.

The SEI Core Strategies Funds are collective trust funds not mutual funds. Collective trust funds are only available to qualified retirement plans and eliminate many of the administrative costs associated with retail and institutional mutual funds. A collective trust fund is exempt from SEC registration as an investment company under the Investment Company Act of 1940. The SEI Core Strategies Funds are managed by SEI Trust Company (STC), the trustee, based on the investment advice of SEI Investments Management Corporation (SIMC). STC and SIMC are wholly owned subsidiaries of SEI Investments Company. For more information on the collective trust funds, including fees and expenses, please read the disclosure document for the trust.

The Russell 3000 Index measures the performance of the largest 3000 U.S. companies representing approximately 98% of the investable U.S. equity market.
