

Pax Small Cap Fund

Q2 2022

INVESTMENT OVERVIEW

A core strategy that fully integrates analysis of sustainability risks and opportunities and focuses on higher quality companies at reasonable prices.

- The Fund uses a proprietary sustainability lens and ESG* research to better manage sustainability risks and identify opportunities and is fossil fuel free.
- Bottom-up stock selection focuses on companies that exhibit high free cash flow, strong balance sheets, undervalued growth potential and management teams that exercise capital discipline.
- Seeks to control volatility and reduce downside risk through a focus on valuation and quality, together with a strong sell discipline.
- Promotes improved corporate outcomes through Pax's shareholder engagement program and proxy voting efforts.

RISK: Equity investments are subject to market fluctuations, the fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings. Funds that emphasize investments in smaller companies generally will experience greater price volatility. The Fund is actively managed. The investment techniques and decisions of the investment adviser and the Fund's portfolio manager(s), including the investment adviser's assessment of a company's ESG profile when selecting investments for the Fund, may not produce the desired results and may adversely impact the Fund's performance, including relative to other Funds that do not consider ESG factors or come to different conclusions regarding such factors.

You should consider a fund's investment objectives, risks, and charges and expenses carefully before investing. For this and other information, call 800.767.1729 or visit www.impaxam.com for a fund prospectus and read it carefully before investing.

For more information, please visit impaxam.com or call 800.767.1729.

IMPORTANT INFORMATION

***Environmental, social, and governance (ESG)** criteria are a set of standards for a company's operations that socially conscious investors use to screen potential investments. Environmental criteria consider how a company performs as a steward of nature. Social criteria examine how it manages relationships with employees, suppliers, customers, and the communities where it operates. Governance deals with a company's leadership, executive pay, audits, internal controls, and shareholder rights.

^YThe Total Expense figures include "Other Expenses" of 0.15%. For more information, please see the Fund's prospectus.

⁹Figures include reinvested dividends, capital gains distributions, and changes in principal value.

^XThe **Russell 2000 Index** ("Benchmark") is an unmanaged index and measures the performance of the small-cap segment of the US equity universe. The Russell 2000 Index is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership.

^JThe **Lipper Small-Cap Core Funds Index** tracks the results of the 30 largest mutual funds in the Lipper Small-Cap Core Funds Average. The Lipper Small-Cap Core Funds Average is a total return performance average of the mutual funds tracked by Lipper, Inc. that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) below Lipper's USDE small-cap ceiling. Small-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SmallCap 600 Index. The Lipper Small-Cap Core Funds Index is not what is typically considered to be an "index" because it tracks the performance of other mutual funds rather than the changes in the value of a group of securities, a securities index or some other traditional economic indicator.

^I**Lipper Small-Cap Core Average** is the average return of the entire Lipper Small-Cap Core classification. The Lipper Small Cap Core Funds Average is a total return performance average of the mutual funds tracked by Lipper, Inc. that, by portfolio practice, invest at least 75% of their equity assets in companies with market capitalizations (on a three-year weighted basis) below Lipper's USDE small-cap ceiling. Small cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SmallCap 600 Index. The Lipper Small-Cap Core Funds Index is not what is typically considered to be an "index" because it tracks the performance of other mutual funds rather than the changes in the value of a group of securities, a securities index or some other traditional economic indicator.

One cannot invest directly in any index.

⁹The **Morningstar style box** is a nine-square grid that classifies securities by size along the vertical axis and by style (Value and Growth Characteristics) along the horizontal axis. Morningstar's equity style methodology uses a building block, holdings-based approach. Funds are classified as large, mid, or small based on the market capitalization of its portfolio holdings. Style is determined at the stock level and then those attributes are rolled up to determine the overall investment style of a fund.

^A**Downside Capture** is a measure of an investment manager's overall performance in down-markets and is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. A downside capture ratio less than 100 indicates that the investment manager has outperformed its index during down-markets, while downside capture ratio greater than 100 indicates that the investment manager has underperformed its index during down-markets.

¹**Weighted Average** is an average in which each quantity to be averaged is assigned a weight. These weightings determine the relative importance of each quantity on the average.

²**Standard Deviation** measures a Fund's variation around its mean performance; a high standard deviation implies greater volatility.

³**Beta** reflects the sensitivity of a Fund's return to fluctuations in its benchmark; a beta for a benchmark is 1.00; a beta greater than 1.00 indicates above average volatility and risk.

⁴**Alpha** is a coefficient measuring risk-adjusted performance, considering the risk due to the specific security, rather than the overall market. A positive alpha reflects relative risk-adjusted performance of the Fund versus its benchmark.

⁵**R-Squared** is a measure of how much a portfolio's performance can be explained by the returns from the overall market (or a benchmark index). The measure ranges from 0, which means that the Fund's performance bears no relationship to the performance of the benchmark, to 100, which means that the Fund's performance is perfectly synchronized with the performance of the benchmark.
