

International Small Company Fund

Our Approach

The Fund seeks to invest in the equities of non-U.S.-based companies with total operating revenues of \$500 million or less at the time of initial investment. The portfolio typically comprises 40-65 Exceptional Growth Companies (EGCs), and both its holdings and performance may vary significantly from the index. The strategy's low-turnover approach may be best suited to investors who share our long-term investment horizon.

Holdings

The International Small Company Fund applies Brown Capital’s philosophy of seeking to invest in what we believe to be Exceptional Growth Companies (EGCs) over a three- to five-year horizon and beyond. EGCs offer products and services that save time, lives, money and headaches, or provide exceptional value. EGCs have both the potential and the plan to be multiple times larger over the long term. We believe their sustainable competitive advantages and other characteristics afford us the patience to let growing companies grow, and the tolerance to hold them when they stumble.

Sector exposure represents nontraditional classifications as determined by the Fund's managers. This same objective, non-performance based criteria is consistently used to select portfolio holdings. It should not be assumed that any of the securities transactions, holdings or sectors discussed herein were or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. BCM reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. Diversification does not eliminate the risk of experiencing investment losses.

The **MSCI All Country World ex USA Small Cap Index** for numerous regions and countries across Developed, Emerging, and Frontier Markets. The index includes over 6,400 securities across Developed and Emerging Markets and approximately \$4.4 trillion in free float market capitalization; 4,400 of these small caps are outside the U.S. The index targets approximately 14% of the free-float adjusted market cap in each market. The volatility (beta) of an account may be greater or less than its respective benchmark. One may not invest directly into an index. **Morningstar Foreign Small/Mid Growth Category:** These funds seek capital appreciation by investing in small- and mid-sized international stocks that are growth-oriented. Small- and mid-cap stocks have market capitalizations less than \$5 billion. Growth is defined based on high price/book and price/cash-flow ratios, relative to the MSCI EAFE Index. These funds typically will have less than 20% of assets invested in U.S. stocks. The volatility (beta) of an account may be greater or less than its respective benchmark. One may not invest directly into an index.

The Morningstar Rating for funds, or star rating, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed products monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10 year (if applicable) Morningstar Rating metrics. The weights are 100% three-year rating for 36-59 months of total returns, 60% five year rating/40%three-year rating for 60-119 months of total returns, and 50% 10 year rating/30%five-year rating/20%three year rating for 120 or more months of total returns. While the 10 year overall rating formula seems to give the most weight to the 10 year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Brown Capital Management International Small Company Fund were rated against the following numbers of Foreign Small/Mid Growth funds over the following time periods as of 06/30/2022: 129 of funds in the 3-year rating and for the Overall rating, and 115 of funds in the last five years. With respect to these Foreign Small/Mid Growth funds, Brown Capital Management International Small Company Fund received a Morningstar Rating™ of 3 stars for the 3- year rating, and 5 stars for 5- year rating periods, respectively.
