INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term capital growth by investing primarily in small companies whose common stocks are believed to be undervalued.

Focus on small-company stocks T. Rowe Price believes do not reflect their underlying value.

Intensive in-house research identifies undervalued stocks by considering, among other factors:

- Low price/earnings, price/book value, and price/cash flow ratios
- Solid financial characteristics

BENEFITS AND RISKS

Small-cap stocks may offer greater capital appreciation potential than large-company stocks.

Flexibility to respond more quickly to changes in the marketplace.

Investing in small companies involves greater risk than is customarily associated with larger companies, since small companies often have limited product lines, markets, or financial resources.

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 4, 4, and 4 stars among 578, 536 and 356 Small Blend funds for the 3-, 5-, and 10-year periods (as applicable) ending 9/30/2022, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history.
