

Franklin International Equity Fund

Growth | Fact Sheet as of September 30, 2022

Investment Overview

Seeks maximum long-term total return by investing primarily in non-U.S. stocks. Uses a quantitative process that assesses stocks by relative attractiveness based on a variety of measures including value, cash flow, earnings growth and sentiment. Region, country and sector allocations are based on rankings generated by the subadviser's proprietary models. May invest up to 35% of its total assets in emerging markets.

Performance data quoted represents past performance, which does not guarantee future results. Current performance may be lower or higher than the figures shown. Principal value and investment returns will fluctuate, and investors' shares, when redeemed, may be worth more or less than the original cost. Performance would have been lower if fees had not been waived in various periods. Total returns assume the reinvestment of all distributions and the deduction of all fund expenses. Returns with sales charge reflect a deduction of the stated maximum sales charge. An investor cannot invest directly in an index, and unmanaged index returns do not reflect any fees, expenses or sales charges. Returns for periods of less than one year are not annualized. All classes of shares may not be available to all investors or through all distribution channels. For current month-end performance, please visit www.franklintempleton.com.

Effective August 2, 2021, except as noted below, Class C [including Class C, Class C-1 & Class C-2] shares will automatically convert to Class A shares after the shares have been held for 8 years from their original purchase date. The initial conversion took place on August 16, 2021. Refer to the fund's prospectus or contact your Service Agent for more information.

Share Class Details

	CUSIP	Ticker	Sales Charges (%)		Expenses (%)	
			Max	CDSC	Gross	Net
Class C	524686284	LMGEX	0.00	1.00	2.09	2.05
Class A	524686292	LMEAX	5.50	—	1.29	1.28
Class FI	524686268	LGFEX	0.00	—	1.31	1.30
Class I	524686276	LGIEX	0.00	—	1.01	0.95
Class IS	524686243	LIESX	0.00	—	0.90	0.85
Class R	524686250	LMIRX	0.00	—	1.62	1.55

Gross expenses are the fund's total annual operating expenses as of the fund's prospectus available at the time of publication. Actual fees may be higher and may impact portfolio returns. Net expenses reflect contractual fee waivers, expense caps and/or reimbursements, which cannot be terminated prior to 12/31/2023 without Board consent.

There is a 1% CDSC on any Class C shares you sell within 12 months of purchase.

Maximum sales charges have been updated as of August 15, 2022, please refer the Fund's prospectus for more information.

What should I know before investing?

Equity securities are subject to price fluctuation and possible loss of principal. International investments are subject to special risks, including currency fluctuations and social, economic and political uncertainties, which could increase volatility. These risks are magnified in emerging markets. Potential active and frequent trading may result in higher transaction costs and increased investor liability. The Fund is more susceptible to any economic, business, political, regulatory or other developments that adversely affect issuers in the financial services industry than a Fund that does not concentrate its investments in the financial services industry. Derivatives, such as options and futures, can be illiquid, may disproportionately increase losses, and have a potentially large impact on Fund performance.

Glossary

Beta A measure of the fund's volatility relative to the market, as represented by the stated Index. A beta greater than 1.00 indicates volatility greater than the market. **R-squared** measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1 implies perfect linear relationship and zero implies no relationship exists. **Sharpe Ratio** refers to a risk-adjusted measure calculated using standard deviation and excess returns to determine reward per unit of risk. The higher the ratio, the greater the risk-adjusted performance. **Standard Deviation** measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return. **Alpha** is the annualized percentage difference between a portfolio's actual returns and its expected performance given its level of market risk, as measured by beta. **Information Ratio** In investing terminology, the ratio of expected return to risk. Usually, this statistical technique is used to measure a manager's performance against a benchmark. This measure explicitly relates the degree by which an investment has beaten the benchmark to the consistency by which the investment has beaten the benchmark. **Tracking Error** measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time. Expressed as a percentage. The more passively the investment fund is managed, the smaller the tracking error. **Turnover** is a measure of the fund's trading activity which represents the portion of the fund's holdings that has changed over a twelve-month period through the fiscal year end. There is no assurance that the fund will maintain its current level of turnover. **Price to Book** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.
