

Fund Information

Began operations: June 17, 1999

Objective: The fund's investment objective is long-term capital appreciation.

Distinguishing characteristics: This strategy seeks broad exposure to emerging markets opportunities, principally by investing in emerging markets companies as well as multinational companies with material emerging markets exposure. It also includes a relatively small opportunistic sleeve of emerging markets fixed income with attractive total return potential. Over the long-term, this strategy may have the potential to help provide emerging markets-like returns with developed markets-like volatility.

Types of investments: Common stocks and other equity-type securities, corporate and government bonds, and cash and equivalents.

Non-U.S. holdings: The fund will invest at least 35% of assets in securities of issuers based in qualified developing countries.

Portfolio restrictions: The fund may invest in debt securities, which may be rated below investment grade (BB/BA and below, or unrated, but determined by the fund's investment adviser to be of equivalent quality).

Implementation guidance: Consider for an emerging markets allocation

Minimum initial investment: \$250

Fund number: 36 **CUSIP:** 649280 10 4

Investment process

Capital Group's American Funds has helped investors since 1931 with a consistent approach that has led to consistent long-term results. The Capital SystemSM investment process divides funds into portions that are managed independently by investment professionals with diverse backgrounds and approaches, backed by an extensive global research effort.

Fund's annualized 30-day SEC yield (net): 0.34% (for Class A shares at MOP as of 9/30/22)

Investments are not FDIC-insured, nor are they deposits of or guaranteed by a bank or any other entity, so they may lose value.

Investors should carefully consider investment objectives, risks, charges and expenses. This and other important information is contained in the fund prospectuses and summary prospectuses, which can be obtained from a financial professional and should be read carefully before investing.

The return of principal for bond funds and for funds with significant underlying bond holdings is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings.

Lower rated bonds are subject to greater fluctuations in value and risk of loss of income and principal than higher rated bonds.

Investing outside the United States involves risks, such as currency fluctuations, periods of illiquidity and price volatility. These risks may be heightened in connection with investments in developing countries.

There may have been periods when the results lagged the index(es). The indexes are unmanaged and, therefore, have no expenses. Investors cannot invest directly in an index.

MSCI has not approved, reviewed or produced this report, makes no express or implied warranties or representations and is not liable whatsoever for any data in the report. You may not redistribute the MSCI data or use it as a basis for other indices or investment products.

Totals may not reconcile due to rounding.

Investment results assume all distributions are reinvested and reflect applicable fees and expenses.

When applicable, results reflect fee waivers and/or expense reimbursements, without which they would have been lower and net expenses higher. Please see capitalgroup.com for more information. For more information on fee waivers and expense reimbursements, visit capitalgroup.com.

¹Expense ratios are as of each fund's prospectus available at the time of publication.

²The portfolio managers shown are as of each fund's prospectus available at the time of publication.

³Returns for less than one year are not annualized, but calculated as cumulative total returns.

⁴YTD (year-to-date return): the net change in the value of the portfolio (in percentage terms) from January 1 of the current year to the date shown above. In cases where the fund was first offered in the current year, the net change in the value of the portfolio (in percentage terms) is shown since fund inception.

⁵Results for certain funds with an inception date after the share class inception also include hypothetical returns because those funds' shares sold after the funds' date of first offering.

⁶Figures include convertible securities. The equity breakdown by revenue reflects the portfolio's publicly traded equity holdings and excludes cash (and fixed income securities, if applicable). Underlying revenue data were compiled by MSCI and account for disparities in the way companies report their revenues across geographic segments. MSCI breaks out each company's reported revenues into country-by-country estimates. MSCI provides revenue data figures based on a proprietary, standardized model. Revenue exposure at the portfolio and index level was calculated by using FactSet, which takes these company revenue exposures and multiplies by the company's weighting in the portfolio and index. In this breakdown, Israel has been included in Europe.

⁷Cash and equivalents includes short-term securities, accrued income and other assets less liabilities. It may also include investments in money market or similar funds managed by the investment adviser or its affiliates that are not offered to the public.

⁸Accrued income and the timing of its settlement, as well as classification of convertible bonds as debt or equity, can cause slight variations in the balances displayed in different portfolio composition breakdowns.

TERMS & DEFINITIONS

MSCI All Country World Index (ACWI): MSCI All Country World Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global developed and emerging markets, consisting of more than 40 developed and emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

MSCI Emerging Markets Index: MSCI Emerging Markets Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results in the global emerging markets, consisting of more than 20 emerging market country indexes. Results reflect dividends gross of withholding taxes through December 31, 2000, and dividends net of withholding taxes thereafter. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.

MSCI World Index: MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market results of developed markets. The index consists of more than 20 developed market country indexes, including the United States. Results reflect dividends net of withholding taxes. This index is unmanaged, and its results include reinvested dividends and/or distributions but do not reflect the effect of sales charges, commissions, account fees, expenses or U.S. federal income taxes.
