

BNY Mellon International Equity Income Fund

FACT SHEET
Sep 30, 2022

Class M **MLIMX** Investor Shares **MLIIX**

Goal/Approach

The fund seeks total return (consisting of capital appreciation and income). To pursue its goal, the fund normally invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. The fund focuses on dividend-paying stocks of foreign companies, including those in emerging market countries. The fund normally invests substantially all of its assets in the equity securities of issuers located outside the United States and diversifies broadly among developed and emerging market countries. The fund may invest in the stocks of companies of any market capitalization.

Risks: **Equities** are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in **foreign denominated and/or domiciled securities** involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. *Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.*
