Growth of a \$10,000 Investment¹

A hypothetical \$10,000 investment in the fund's Class A shares on 2/4/72 would have been worth \$851,250 on 9/30/22.

The performance data quoted represents past performance, which is no guarantee of future results. Share price and investment return fluctuate, and an investor's shares may be worth more or less than original cost upon redemption. Current performance may be lower or higher than the performance quoted. Performance for periods less than 1 year is not annualized. Go to im.bnymellon.com for the fund's most recent month-end returns. The net expense ratio(s) reflect a contractual expense reduction agreement through 6/30/2023, without which, the returns would have been lower. Total Expense Ratios: Class A 1.10%, Class C 1.86%, Class I 0.82%, Class Z 0.84%, Class Y 0.78%. Net Expense Ratios: Class A 1.03%, Class C 1.78%, Class I 0.78%, Class Z 0.83%, Class Y 0.78%. Not all classes of shares may be available to all investors or through all broker-dealer platforms.

Class Z shares generally are not available for new accounts. Please see the fund's prospectus for details.

¹The total return performance figures for Class A and Class Y shares of the fund represent the performance of the fund's Class Z shares for periods prior to 9/30/08, and 7/1/13, the inception dates for Class A and Class Y shares, respectively, and the performance of Class A and Y, respectively, from those inception dates. Performance reflects the applicable class's sales load and distribution/servicing fees since the inception date. Had these fees and expenses been reflected for periods prior, performance would have been lower. Investors should consider, when deciding whether to purchase a particular class of shares, the investment amount, class restrictions, anticipated holding period and other relevant factors. ²Portfolio composition is as of 9/30/2022 and is subject to change at any time. ³Performance figures may reflect reimbursements or fee waivers, without which the performance would have been lower. ⁴Source: FactSet. Risks: Equities are subject to market, market sector, market liquidity, issuer, and investment style risks, among other factors, to varying degrees. Investing in foreign denominated and/or domiciled securities involves special risks, including changes in currency exchange rates, political, economic, and social instability, limited company information, differing auditing and legal standards, and less market liquidity. These risks generally are greater with emerging market countries. Recent market risks include pandemic risks related to COVID-19. The effects of COVID-19 have contributed to increased volatility in global markets and will likely affect certain countries, companies, industries and market sectors more dramatically than others. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
