Fact Sheet

MFS[®] Technology Fund

Objective

Seeks capital appreciation.

Investment team **Portfolio Managers**

- Reinier Dobbelmann
- 23 years with MFS
- 28 years in industry
- Matthew Sabel
- 12 years with MFS
- 25 years in industry

Fund benchmark

Standard & Poor's North American **Technology Sector Index**

Risk measures vs. benchmark

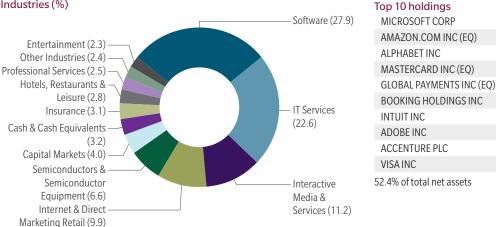

(Class I)					
Alpha	-1.58				
Beta	0.95				
Sharpe Ratio	0.73				
Standard Deviation	17.64				
Risk measures are based on a trailing 10					
year period.					

Fund Symbol and CUSIP

I	MTCIX	552983439
R6	MTCLX	55273H338
А	MTCAX	552983462
С	MTCCX	552983447

Focuses on technology stocks believed to have above-average growth potential. These stocks generally come from the computer systems and software, networking and telecommunications, internet, business services, and electronics industries but may also include investments from other technology-related industries.

Industries (%)

1.6% Other. Other consists of: (i) currency derivatives and/or (ii) any derivative offsets.

Growth of \$10,000 Class I shares 09/30/12 - 09/30/22

Past performance is no guarantee of future results. Fund returns assume the reinvestment of dividends and capital gain distributions. Class I shares are available without a sales charge to eligible investors.

Average annual total returns (%)

	Inception Date	10 Year	5 Year	3 Year	1 Year
Class I	01/02/97	13.53	9.26	4.98	-34.73
Class R6	01/02/13	13.65	9.37	5.08	-34.65
Class A without sales charge	01/02/97	13.26	8.99	4.73	-34.89
Class A with 5.75% maximum sales charge	01/02/97	12.59	7.71	2.68	-38.64
Standard & Poor's North American Technology Sector Index	N/A	16.17	13.29	9.30	-30.58

Performance data shown represent past performance and are no guarantee of future results. Investment return and principal value fluctuate so your shares, when sold, may be worth more or less than the original cost; current performance may be lower or higher than quoted. For most recent month-end performance, please visit mfs.com.

Performance results reflect any applicable expense subsidies and waivers in effect during the periods shown. Without such subsidies and waivers the fund's performance results would be less favorable. All results assume the reinvestment of dividends and capital gains. It is not possible to invest directly in an index.

Performance for Class R shares includes the performance of the fund's Class I shares, adjusted to take into account differences in sales loads and class-specific operating expenses (such as Rule 12b-1 fees), if any, for periods prior to their offering. Please see the prospectus for additional information about performance and expenses.

Class R6 shares are available without a sales charge to eligible investors.

Fact Sheet | Q3 | 2022

Glossary

Alpha is a measure of the portfolio's riskadjusted performance. When compared to the portfolio's beta, a positive alpha indicates better-than-expected portfolio performance and a negative indicates alpha worse-thanexpected portfolio performance.

Beta is a measure of the volatility of a portfolio relative to the overall market. A beta less than 1.0 indicates lower risk than the market; a beta greater than 1.0 indicates higher risk than the market. It is most reliable as a risk measure when the return fluctuations of the portfolio are highly correlated with the return fluctuations of the index chosen to represent the market.

Sharpe Ratio is a risk-adjusted measure calculated to determine reward per unit of risk. It uses a standard deviation and excess return. The higher the Sharpe Ratio, the better the portfolio's historical risk-adjusted performance.

Standard Deviation is an indicator of the portfolio's total return volatility, which is based on a minimum of 36 monthly returns. The larger the portfolio's standard deviation, the greater the portfolio's volatility.

Market Capitalization is the value of a corporation as determined by the market price of its outstanding common stock. It is calculated by multiplying the number of shares by the current market price of a share.

Price/Book ratio (P/B) is the ratio of a stock's price to its book value per share.

Weighted average price/earnings (P/E) ratio is the ratio of the current price of a stock to an estimate of forward 12 month earnings; P/E ex-negatives ratio is an exposure-weighted average of the P/E ratios of the securities held, excluding companies with projected negative earnings.

Turnover Ratio is the percentage of a portfolio's securities that have changed over the course of a year: (lesser of purchases or sales)/average market value.

MFS° Technology Fund

CALENDAR YEAR TOTAL RETURNS (%)										
	'12	'13	'14	'15	'16	'17	'18	'19	'20	'21
Class I	14.51	35.58	10.61	10.63	8.41	38.80	1.85	36.07	46.42	13.65
Standard & Poor's North American Technology Sector Index	15.23	34.57	15.28	9.91	13.56	37.78	2.88	42.68	45.15	26.40

Past performance is no guarantee of future results.

FUND EXPENSES (%)			
	Class I	Class R6	Class A
Gross Expense Ratio	0.87	0.78	1.12
Net Expense Ratio	0.87	0.78	1.12

Gross Expense Ratio is the fund's total operating expense ratio from the fund's most recent prospectus. **Net Expense Ratio** reflects the reduction of expenses from contractual fee waivers and reimbursements. Elimination of these reductions will result in higher expenses and lower performance.

TUNDUAIA	
Inception Date	01/02/97
Net Assets	\$1.2 billion
Number of Issues	70
Market Cap (weighted avg.)	\$573.6 billion
Price/Book (weighted avg.)	4.8
Price/Earnings (12 months forward weighted avg.)	21.0
Turnover Ratio	29%

Important risk considerations

The fund may not achieve its objective and/or you could lose money on your investment in the fund. **Stock**: Stock markets and investments in individual stocks are volatile and can decline significantly in response to or investor perception of, issuer, market, economic, industry, political, regulatory, geopolitical, environmental, public health, and other conditions. **International**: Investments in foreign markets can involve greater risk and volatility than U.S. investments because of adverse market, currency, economic, industry, political, regulatory, geopolitical, or other conditions. **Growth**: Investments in growth companies can be more sensitive to the company's earnings and more volatile than the stock market in general. **Concentrated**: The portfolio's performance could be more volatile than the performance of more diversified portfolios. **Technology**: Investments in the technology sector can be very volatile because of the rapid pace of product change, technological developments, and other factors. **P**lease see the prospectus for further information on these and other risk considerations.
