About the Fund

Investment Objective:

Long-term capital appreciation.

Reasons to Invest:

Seeks to outperform the MSCI World ex-US Index of large and mid-cap non-U.S. stocks.

Invests based on three proven investment styles: value, momentum and profitability.

By diversifying across three distinct investment styles, the Fund seeks to provide more consistent returns.

Potential Advantages:

Systematic, Repeatable Process

Style investing is a systematic, repeatable process that seeks to efficiently harvest the returns to value, momentum and profitability.

Academic Research Foundation

Decades of academic and practitioner research have shown that investing in stocks based on value, momentum and profitability may provide returns in excess of market benchmarks.

Trading Infrastructure

Customized liquidity-providing algorithms seeking to minimize transaction costs.

Experienced Management Team

AQR senior management has been working together and implementing style-based portfolios since the mid-1990s.

Investment Approach

- The Fund seeks to invest in stocks of attractively valued Large and mid-cap international market companies that have positive momentum and strong profitability.
- The advisor uses a disciplined, systematic approach that employs multiple measures of value, momentum and profitability.
- The advisor ranks each stock's attractiveness for each of these three systematic styles, and selects those with a high combined score.
- The Fund's integrated approach seeks to offer a diversified, well-constructed core investment strategy that may provide returns consistently in excess of the overall market.
- Combining exposures to all three styles in an integrated portfolio can help reduce portfolio turnover and minimize transaction costs.
- Trades are executed using proprietary, automated algorithms in a liquidity-providing manner that seeks to reduce the total cost of trading.

Definitions:

Morgan Stanley Capital International World ex-USA Index: A market capitalization weighted index composed of companies representative of the market structure of 23 Developed market countries in North America, Europe and the Asia/Pacific Region, excluding the USA.

EPS Growth (5 Year): The growth of the earning per share over the last five years.

P/B (Price to Book Ratio): A valuation ratio of a company's current share price compared to its book value.

P/E (Price to Earnings Ratio): A valuation ratio of a company's current share price compared to its per-share earnings.

Price Momentum: Total return over the prior twelve months excluding the last month.

Fund Facts

	Ticker	CUSIP	Inception Date	Investment Minimum*	12b-1 Fee	Gross Expense Ratio	Net Expense Ratio**
Class I Shares	QICLX	00203H537	3/26/13	\$5 Million	None	0.61%	0.56%

*Investment minimums are waived or reduced for certain investors. Some financial intermediaries may not offer Class R6 Shares or may impose different or additional eligibility and minimum investment requirements. See the Prospectus for additional details.

**The Adviser has contractually agreed to reimburse operating expenses of the Fund at least through January 28, 2023.

The Fund Managers shown are Managers of the Fund as of 1/1/2022.

PRINCIPAL RISKS:

Emerging markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Funds that emphasize investments in small and mid-cap companies generally will experience greater price volatility. Commodities and futures generally are volatile and involve a high degree of risk. The Adviser from time to time employs various hedging techniques, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs.

An investor considering the Fund should be able to tolerate potentially wide price fluctuations. The Fund is subject to high portfolio turnover risk as a result of frequent trading, and thus, will incur a higher level of brokerage fees and commissions, and cause a higher level of tax liability to shareholders in the Fund. Since the Fund may also attempt to increase its income or total return through the use of securities lending, it may be subject to the possibility of additional loss as a result of this investment technique.

The Fund is not suitable for all investors. There are risks involved with investing including the possible loss of principal. Past performance does not guarantee future results. Diversification does not eliminate the risk of experiencing investment losses. This document is intended exclusively for the use of the person to whom it has been delivered by AQR and it is not to be reproduced or redistributed to any other person without AQR's written consent.

On March 8, 2021, the AQR TM International Multi-Style Fund was reorganized into the AQR International Multi-Style Fund.

Please refer to the prospectus or summary prospectus for complete information regarding all risks associated with the fund. An investor should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. To obtain a prospectus or summary prospectus containing this and other information, please call 1-866-290-2688 or download the file from www.aqrfunds.com. Read the prospectus carefully before you invest. There is no assurance the stated objectives will be met.
