## An Alternative Manager with a Long-Term Record of Compelling Performance

As a pioneer in alternatives, Calamos Investments has more than 40 years of experience investing outside of traditional asset classes. In 2015, Calamos acquired Phineus Partners LP. Since 2002, Phineus has demonstrated its ability to deliver solid performance through an institutional-strength long/short strategy that combines the best of bottom-up equity investing with macro analysis.

### GROWTH OF \$10K: OUTPERFORMANCE SINCE INCEPTION

The chart below shows how a hypothetical \$10,000 investment in the fund performed versus the benchmarks S&P 500 Index and MSCI World Index since the fund's inception.

10k Performance are before taxes on fund distributions and assume reinvestment of dividends and capital gains. Index data shown is from 5/1/02, since comparative index data is available only for full monthly periods. Source: Calamos Investments

Index data shown reflects full month periods only. If share class inception date is on or before the 15th of the month, the index calculation inception date begins on the first day of that month. If share class inception date is after the 15th of the month, the index calculation inception date begins on the first day of the following month.

**Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Please refer to Important Risk Information. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75%. Had it been included, the Fund's return would have been lower. You can obtain performance data current to the most recent month end by visiting [www.calamos.com](http://www.calamos.com).**

The performance shown for periods prior to 4/6/16 is the performance of a predecessor investment vehicle (the "Predecessor Fund"). The Predecessor Fund was reorganized into the Fund on 4/6/16, the date upon which the Fund commenced operations. On 10/1/15 the parent company of Calamos Advisors, purchased Phineus Partners LP, the prior investment adviser to the Predecessor Fund ("Phineus"), and Calamos Advisors served as the Predecessor Fund's investment adviser between 10/1/15 until it was reorganized into the Fund. Phineus and Calamos Advisors managed the Predecessor Fund using investment policies, objectives, guidelines and restrictions that were in all material respects equivalent to those of the Fund. Phineus and Calamos Advisors managed the Predecessor Fund in this manner either directly or indirectly by investing all of the Predecessor Fund's assets in a master fund structure. The Predecessor Fund performance information has been adjusted to reflect Class A and I shares expenses. However, the Predecessor Fund was not a registered mutual fund and thus was not subject to the same investment and tax restrictions as the Fund. If it had been, the Predecessor Fund's performance may have been lower.

Average annual returns measure net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions. In calculating net investment income, all applicable fees and expenses are deducted from the returns. Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified.

The fund also offers Class C shares, the performance of which may vary.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans and by institutional clients, provided such plans or clients have assets of at least \$1 million. For eligibility requirements and other available share classes see the prospectus and other Fund documents at [www.calamos.com](http://www.calamos.com).

The Refinitiv Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The Refinitiv Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Refinitiv Lipper Fund Award. <sup>1</sup>Sector Weightings are calculated as a percentage of net assets and exclude cash or cash equivalents, any government / sovereign bonds or broad-based index hedging securities the portfolio may hold. The Sector table Other row includes securities that do not have a sector classification. You can obtain a complete listing of holdings by visiting [www.calamos.com](http://www.calamos.com).

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Please refer to Important Risk Information.

Exposure is shown as a percentage of fund net asset value. Delta adjusted basis exposure is calculated by Calamos Advisors LLC and is specific only to that point in time since a security's delta changes continuously with market activity.

Alpha is a measurement of performance on a risk-adjusted basis. A positive alpha shows that performance of a portfolio was higher than expected given the risk. A negative alpha shows that the performance was less than expected given the risk.

Downside capture ratio measures manager's performance in down markets as defined by the named index. A down-market is defined as those periods (months or quarters) in which named index return is less than 0. In essence, it tells you what percentage of the down-market was captured by the manager. For example, if the ratio is 110%, the manager has captured 110% of the down-market and therefore underperformed the market on the downside.

Gross exposure refers to the sum or the absolute value of a fund's long positions and short positions.

Net exposure is the difference between a fund's long positions and its short positions.

Sharpe ratio is a calculation that reflects the reward per each unit of risk in a portfolio. The higher the ratio, the better the portfolio's risk-adjusted return is.

Upside capture ratio measures a manager's performance in up markets relative to a named index. It is calculated by taking the security's upside capture return and dividing it by the benchmark's upside capture return.

S&P 500 Index is generally considered representative of the US stock market.

The MSCI World Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets.

Morningstar Long-Short Equity Category funds hold sizeable stakes in both long and short positions in equities, exchange traded funds, and related derivatives.
