

Calamos Select Fund

REFINITIV LIPPER FUND AWARDS

2022 WINNER UNITED STATES

BEST OVERALL FUND GROUP

Small Fund Family Group Over Three Years

OVERVIEW

The fund primarily invests in a concentrated portfolio of large cap US equities with broad representation across sectors, industries and investment styles.

KEY FEATURES

- » Security selection is based mainly on Calamos analysts' highest conviction ideas. We leverage the collective expertise of the firm's research analysts, who average 15+ years of experience in their respective sectors.
- » The investment process is driven by rigorous fundamental and sector-specific research. The goal is to maximize exposure to opportunities the team believes are most compelling.
- » Quantitative tools help minimize systematic risks across both sectors and factors. We use quantitative tools to minimize unintended bets and maximize the impact of security selection on portfolio performance.

PORTFOLIO FIT

Because the fund pairs a high-conviction approach with a broad investment universe, we believe it is an attractive choice for investors seeking a long-term core equity allocation to US stocks.

Investment Process

Calamos Select Fund is a large-cap equity portfolio with 50 to 70 high-conviction stock holdings seeking to outperform the S&P 500 Index over market cycles. Our disciplined process seeks to deliver a combination of income and long-term capital appreciation, maximizing idiosyncratic alpha generation through stock selection while minimizing systematic risks across sectors and factors.

1. IDENTIFY OPPORTUNITIES

- » Our senior analysts research and cover hundreds of stocks, prioritizing the attractiveness of each to generate a list of "best ideas."
- » This becomes the foundation of the portfolio.
- » Portfolio managers monitor changes to this list and frequently engage analysts to discuss positioning within sectors.

2. CONSTRUCT THE PORTFOLIO

- » Portfolio construction is subject to rigorous quantitative evaluation by our senior risk management team.
- » Quantitative tools help determine security, industry and sector positions to generate an efficient portfolio that minimizes systematic and factor risks.
- » The majority of performance is dictated by stock selection, thereby mitigating unintended factor risks.

3. CONDUCT ONGOING MONITORING

- » The Investment Committee, portfolio management, research team and risk management group collectively conduct multi-faceted risk analysis.
- » Stocks are sold when price targets are met or better opportunities emerge elsewhere.
- » The goal is to ensure portfolio optimization as market conditions evolve.

AVERAGE ANNUAL RETURNS (%)

Index data shown reflects full month periods only. If share class inception date is on or before the 15th of the month, the index calculation inception date begins on the first day of that month. If share class inception date is after the 15th of the month, the index calculation inception date begins on the first day of the following month.

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Please refer to Important Risk Information. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75%. Had it been included, the Fund's return would have been lower. You can obtain performance data current to the most recent month end by visiting www.calamos.com.

Average annual returns measure net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions. In calculating net investment income, all applicable fees and expenses are deducted from the returns. Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified.

The fund also offers Class C shares, the performance of which may vary.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans and by institutional clients, provided such plans or clients have assets of at least \$1 million. For eligibility requirements and other available share classes see the prospectus and other Fund documents at www.calamos.com.

The Refinitiv Lipper Fund Awards, granted annually, highlight funds and fund companies that have excelled in delivering consistently strong risk-adjusted performance relative to their peers. The Refinitiv Lipper Fund Awards are based on the Lipper Leader for Consistent Return rating, which is a risk-adjusted performance measure calculated over 36, 60 and 120 months. The fund with the highest Lipper Leader for Consistent Return (Effective Return) value in each eligible classification wins the Refinitiv Lipper Fund Award. For more information, see lipperfundawards.com. ¹Holdings and weightings are subject to change daily. Holdings are provided for informational purposes only and should not be deemed as a recommendation to buy or sell the securities mentioned.

²Top 10 Holdings and Sector Weightings are calculated as a percentage of net assets and exclude cash or cash equivalents, any government / sovereign bonds or broad-based index hedging securities the portfolio may hold. You can obtain a complete listing of holdings by visiting www.calamos.com. The Sector table Other row includes securities that do not have a sector classification.

³Market Capitalization statistics are based on common stock holdings.

Portfolios are managed according to their respective strategies which may differ significantly in terms of security holdings, industry weightings and asset allocation from those of the benchmark(s). Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Please refer to Important Risk Information.

Annualized standard deviation is a statistical measure of the historic volatility of a mutual fund or portfolio.

Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

Debt/capital ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital.

PEG ratio is a stock's price/earnings ratio divided by the estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth.

Portfolio turnover is the percentage of assets in a portfolio that changed over a certain period, often a year; higher turnover indicates greater buying and selling activity.

ROIC (return on invested capital) measures how effectively a company uses the money invested in its operations, calculated as a company's net income minus any dividends divided by the company's total capital.

S&P 500 Index is generally considered representative of the US stock market.

Morningstar Large Blend Category funds are fairly representative of the overall US stock market in size, growth rates, and price. These portfolios tend to invest across the spectrum of US industries, and owing to their broad exposure, the portfolios' returns are often similar to those of the S&P 500 Index.

Unmanaged index returns, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Important risk information. An investment in the Fund(s) is subject to risks, and you could lose money on your investment in the Fund(s). There can be no assurance that the Fund(s) will achieve its investment objective. Your investment in the Fund(s) is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. The risks associated with an investment in the Fund(s) can increase during times of significant market volatility. The Fund(s) also has specific principal risks, which are described below. More detailed information regarding these risks can be found in the Fund's prospectus.

Beta (5-year)	1.01	1.00

The principal risks of investing in the Calamos Select Fund include equity securities risk consisting of market prices declining in general, value stock risk consisting of the potential that a company will never reach its calculated intrinsic value, small and mid-sized company risk, foreign securities risk and portfolio selection risk. As a result of political or economic instability in foreign countries, there can be special risks associated with investing in foreign securities, including fluctuations in currency exchange rates, increased price volatility and difficulty obtaining information. In addition, emerging markets may present additional risk due to the potential for greater economic and political instability in less developed countries. Options risk is the Fund's ability to close out its position as a purchaser or seller of an over-the-counter or exchange-listed put or call option and is dependent, in part, upon the liquidity of the option market. There are significant differences between the securities and options markets that could result in an imperfect correlation among these markets, causing a given transaction not to achieve its objectives. The Fund's ability to utilize options successfully will depend on the ability of the Fund's investment adviser to predict pertinent market movements, which cannot be assured. More detailed information regarding these risks can be found in the Fund's prospectus.

Before investing, carefully consider the fund's investment objectives, risks, charges and expenses. Please see the prospectus and summary prospectus containing this and other information which can be obtained by calling 1-800-582-6959. Read it carefully before investing.
