If the class had been offered prior to 7/1/15, the actual performance and expenses may have differed from the amounts shown. Investor Class: The historical performance shown for periods prior to inception on 12/16/13 was calculated using historical Legacy class performance as adjusted for estimated class-specific expenses for shareholder servicing and sub-transfer agency fees without consideration to any expense limitation or waivers. The annual gross expense ratio is 1.20% as of 11/1/21. The annual net expense ratio is 1.20% as of 11/1/21.

¹The Fund's Index, the Russell 2000[®] Growth Index, measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 Index companies with higher price-to-value ratios and higher forecasted growth values. One cannot invest directly into an index.

Principal Investment Risks

The Investment Adviser uses the Fund's principal investment strategies to achieve the Fund's investment objective of long-term growth of capital. There is no assurance that the Investment Adviser's investment strategies or securities selection method will achieve that investment objective. Equity securities fluctuate in price and value in response to many factors including historical and prospective earnings of the issuer and its financial condition, the value of its assets, general economic conditions, interest rates, investors' perceptions and market liquidity. Generally, the smaller the capitalization of a company, the greater the risk associated with an investment in the company, which is described in greater detail in the prospectus.

There are risks involved with any investment. There are principal risks associated with an investment in the Fund, which could adversely affect its net asset value, yield and return. Please see the section "Further Information About Principal Risks" in the Prospectus for a more detailed discussion of these risks and other factors you should carefully consider before deciding to invest in the Fund. An investment in the Fund may lose money and is not a deposit of a bank or insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency.

Glossary

Number of Holdings: The total number of individual equities held by the Fund. Weighted Average Market Cap: The weighted average of market capitalization (market price multiplied by the number of shares outstanding) of the stocks in the portfolio, weighted according to its percent held in the fund. Price-to-Earnings: A valuation ratio of current share price compared to its per-share operating earnings over the previous four quarters. Price-to-Book: A ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share. Price-to-Sales: A ratio for valuing a stock relative to its own past performance, other companies or the market itself. Price to sales is calculated by dividing a stock's current price by its revenue per share for the trailing 12 months. Price-to-Cash Flow: A measure of the market's expectations of a firm's future financial health. Because this measure deals with cash flow, the effects of depreciation and other non-cash factors are removed.
