

Fund Objective

The State Street Institutional U.S. Equity Fund (the "Fund") seeks to provide long-term growth of capital.

Process

The Fund seeks to achieve its investment objective by investing at least 80% of its net assets (plus any borrowings for investment purposes) under normal circumstances in equity securities of U.S. companies, such as common and preferred stocks. A U.S. company is a company that generates at least 50% of its revenues or profits from business activities in the U.S., has at least 50% of its assets situated in the U.S., or has the principal trading market for its securities in the U.S.

The Fund is designed to produce a broadly diversified portfolio, and typically has characteristics similar to the S&P 500® Index, including average market capitalization and dividend yield potential. Stock selection is key to the performance of the Fund.

Through fundamental company research involving analyzing financial statements and other information about a company, the portfolio managers primarily seek to identify securities of large and medium sized companies (meaning companies with market capitalizations of \$2 billion or more) with characteristics such as:

- low valuations in relation to their peers, the market, their historical valuations or their growth rate potential
- financial strength (favorable debt ratios and other financial characteristics)
- high quality management focused on generating shareholder value

The portfolio managers may consider selling a security when one of these characteristics no longer applies, or when valuation becomes excessive and more attractive alternatives are identified.

The Fund also may invest to a lesser extent in securities of foreign (non-U.S.) issuers and debt securities. The portfolio managers may also use various types of derivative instruments (primarily futures contracts) to gain or hedge exposure to certain types of securities as an alternative to investing directly in or selling such securities.

Key Features

- Team based decision making by experienced investment professionals

Performance

Performance vs Benchmark

Past performance is not a reliable indicator of future performance. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit www.ssga.com for most recent month-end performance. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect capital gains and losses, income, and the reinvestment of dividends. The gross expense ratio is the fund's total annual operating expenses ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

Definitions: Weighted average market cap (\$M) is a stock market index weighted by the market capitalization of each stock in the index. In such a weighting scheme, larger companies account for a greater portion of the index. **NAV** is market value of a mutual fund's or ETFs total assets, minus liabilities, divided by the number of shares outstanding. S&P 500® Index is an unmanaged, market capitalization-weighted index of stocks of 500 large U.S. companies, which is widely used as a measure of large-cap U.S. stock market performance. Standard & Poor's and S&P 500 are trademarks of the Standard & Poor's Financial Services LLC ("S&P"). Investors cannot invest directly in an index. The returns of the index do not reflect the actual cost of investing in the instruments that comprise it. The Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.

Important Risk Information

Weights, top holdings, and characteristics are as of the date indicated, are subject to change, and should not be relied upon as current thereafter.

Investing involves risk including the risk of loss of principal.

The whole or any part of this work may not be reproduced, copied or transmitted or any of its contents disclosed to third parties without SSGA's express written consent.

All information is from SSGA unless otherwise noted and has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such.

Equity securities may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions.

Because of their narrow focus, financial sector funds tend to be more volatile. Preferred Securities are subordinated to bonds and other debt instruments, and will be subject to greater credit risk. The municipal market can be affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. The fund may contain interest rate risk (as interest rates rise bond prices usually fall); the risk of issuer default; inflation risk; and issuer call risk. The Fund may invest in U.S. dollar-denominated securities of foreign issuers traded in the United States.

The value of the debt securities may increase or decrease as a result of the following: market fluctuations, increases in interest rates, inability of issuers to repay principal and interest or illiquidity in the debt securities markets; the risk of low rates of return due to reinvestment of securities during periods of falling interest rates or repayment by issuers with higher coupon or interest rates; and/or the risk of low income due to falling interest rates. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. This may result in a reduction in income from debt securities income.

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.

This communication is not intended to be an investment recommendation or investment advice and should not be relied upon as such.

The top ten holdings do not include money market instruments and/or futures contracts. Depositary receipts are normally combined with the underlying security. The securities cited may not represent the Fund's current or future holdings and should not be construed as a recommendation to purchase or sell a particular security. The figures presented do not include the Fund's entire investment portfolio and may change at any time.

The securities information regarding holdings, allocations and other characteristics are presented to illustrate examples of securities that the Fund has bought and the diversity of areas in which the Fund may invest as of a particular date. It may not be representative of the Fund's current or future investments and should not be construed as a recommendation to purchase or sell a particular security. Please visit us online at www.ssga.com for the most recent portfolio holdings information.

"Cash Equivalents" includes an investment in the State Street Institutional Government Money Market Fund. "Other" includes accruals. As of 07/01/2016 State Street Global Advisors is the investment advisor of the Fund. SSGA Funds Management, Inc. serves as the investment advisor of the State Street Institutional Government Money Market Fund.

Considering the risks: A principal risk of investing in the Fund is the risk that the value of equity securities may decline. While stocks have historically outperformed other asset classes over the long term, they tend to fluctuate over the short term as a result of factors affecting the individual companies, industries or the securities market as a whole. Securities with different characteristics tend to shift in and out of favor depending upon market and economic conditions. These and other risk considerations are discussed in the Fund's prospectus and summary prospectus.

Distributor: State Street Global Advisors Funds Distributors, LLC, member FINRA, SIPC, an indirect wholly owned subsidiary of State Street Corporation. References to State Street may include State Street Corporation and its affiliates. The SSGA® Funds pay State Street Bank and Trust Company for its services as custodian, transfer agent and shareholder servicing agent and pays SSGA Funds Management, Inc. for investment advisory services.

Before investing, consider the funds' investment objectives, risks, charges and expenses. To obtain a prospectus or summary prospectus which contains this and other information, call 1-800-242-0134 or visit www.ssga.com. Read it carefully.
