

## Investment Objective and Strategy

The fund seeks long-term capital appreciation. The fund will, under normal circumstances, invest at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in equity securities, including preferred stocks, issued by emerging markets companies. Emerging markets companies include companies that are listed or traded principally in, have their primary operations in, are domiciled in or derive a majority of their revenue from emerging market countries as defined by the MSCI Emerging Markets® Index.

## Subadviser(s) History

<u>Name</u>	<u>Start Date</u>	<u>Target Allocation</u>
UBS Asset Management	1/4/2018	40%
Lazard Asset Management LLC	1/4/2018	60%

## Volatility Measures

	<u>3 Years</u>	<u>5 Years</u>
Beta	0.99	-N/A
Standard Deviation	19.26	-N/A
Sharpe Ratio	-0.07	-N/A

**Statistics are for Instl Class Shares**

**Beta** measures a fund's sensitivity to market

movements. A beta of 1.0 indicates a fund has been exactly as volatile as the market.

**Standard Deviation** is the percentage by which a fund's performance has varied from its average performance in any given month during the period indicated. The higher the standard deviation, the more variable the returns.

**Sharpe Ratio** measures the fund's excess return compared to a risk-free investment. The higher the Sharpe ratio, the better the returns relative to the risk taken.

**P/E Ratio** is the price of a stock divided by its earnings per share. **Turnover Ratio** as of 12/31/2021

*Please consider the investment objectives, risks, fees and expenses carefully before investing. For this and other important information, you may obtain mutual fund prospectuses from your registered representative or by visiting [greatwestfunds.com](http://greatwestfunds.com). Read them carefully before investing.*

*Current performance may be lower or higher than performance data shown. Performance data quoted represents past performance and is not a guarantee or prediction of future results. The investment return and principal of an investment will fluctuate so that, when redeemed, shares may be worth more or less than their original cost. The returns and fund operating expenses are expressed as percentages. 3, 5 and 10 Year/Since Inception returns shown are annualized. For 10 Year/Since Inception, if the fund was not in existence for 10 years, returns shown are since inception. The net expense ratio may reflect a fee waiver. Absent the waiver, the performance would have been lower. Performance current to the most recent month-end can be found at [www.greatwestfunds.com](http://www.greatwestfunds.com). Performance does not include any fees or expenses of variable insurance products, if applicable. If such fees or expenses were included, returns would be lower.*

*Extended performance is derived from the historical performance of the oldest share class, prior to the newer class' inception date. Extended performance is adjusted down when the newer class is more expensive but is not adjusted for cases where the newer share class is less expensive.*

No assurance investment objectives will be met. Foreign securities involve risks, such as currency fluctuations, economic change and political developments. These risks may be heightened in emerging markets, which may also experience liquidity risk. See the prospectus for a complete discussion of the Fund's risks.

Holdings subject to change and are not a recommendation to buy or sell a security.

The Fund's benchmark is the MSCI Emerging Markets® Index. The MSCI Emerging Markets® Index is designed to measure the performance of the large- and mid-cap securities universe of 24 Emerging Market Countries. It is designed to take into account variations reflecting conditions across regions, market-cap segments, sectors and styles.

Index performance does not reflect the expenses of managing a portfolio as an index is unmanaged, does not incur fees or expenses, and is not available for investment. Performance of an index fund will generally be less than its benchmark index.

Neither Morningstar and/or its content providers are responsible for any damages or losses arising from any use of this information.

Morningstar Rating: For each fund with at least a 3-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages). The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics.

Rating information for share classes without a 3-, 5- or 10-year history, as applicable is based on extended performance.

Portfolio Date is the effective data for certain data. As-of-Date is the effective period run date for which the sheet is being produced.
