¹Definitions of terms: "30-day SEC yield" is a standard yield calculation developed by the Securities and Exchange Commission that allows investors to more fairly compare funds. ²Returns are based on the composite closing price and do not represent the returns you would receive if you traded shares at other times. The first trading date is typically several days after the fund inception date. Therefore, NAV is used to calculate market returns prior to the first trade date. ³NAV total returns for the fund are used to calculate Growth of \$10,000. ©2022 PSA FS-2021-3779452.3

Investing involves risk, including the possible loss of principal. This ProShares ETF is subject to certain risks, including the risk that the fund may not track the performance of the index and that the fund's market price may fluctuate, which may decrease performance. This fund is exposed to the stocks of large cap companies, which tend to go through cycles of outperformance or underperformance lasting up to several years relative to other segments of the stock market. As a result, large cap returns may trail the returns of the overall stock market or other market segments. Please see the summary and full prospectuses for a more complete description of risks. **There is no guarantee any ProShares ETF will achieve its investment objective.**
