Exchange	NYSE Arca
Underlying Index	Northern Trust International Quality Dividend Index SM
Index Ticker	NTIQDNTR
IOPV Ticker	IQDF.IV
Estimated Cash Ticker	IQDF.EU
Net Assets	\$492,667,426
Shares Outstanding	24,300,001
No. of Holdings	292

EXPENSE RATIO (%)

Management Fee	0.47
Acquired Fund Fees and Expenses	0.00
Other Expenses	0.01
Gross Expense Ratio	0.48
Expense Reimbursement	-0.01
Net Expense Ratio	0.47

FUND CHARACTERISTICS

Average Market Cap (\$)	63,420,979,577
Price to Earnings	14.00
Price to Book	3.81
SEC Subsidized Yield	6.10%
SEC Unsubsidized Yield	6.09%

The **30-Day SEC Subsidized Yield** is computed under an SEC standardized formula based on net income earned over the past 30 days. It is a "subsidized" yield, which means it includes contractual expense reimbursements and it would be lower without those reimbursements. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next. The **30-Day SEC Unsubsidized Yield** calculation is also computed under the same SEC standardized formula based on net income earned over the past 30 days, but excludes contractual expense reimbursements, resulting in a lower yield. It may also include an inflation adjustment that can cause the yield to vary substantially from one month to the next.

QUARTER END PERFORMANCE (%)

As of June 30, 2022

	QTD	YTD	1 Yr.	3 Yr.	5 Yr.	7 Yr.	Since Inception
IQDF NAV Return	-13.85	-18.37	-19.18	N/A	0.28	1.54	1.84
IQDF Market Return (Bid-Ask Midpoint)	-12.47	-17.68	-18.78	0.32	0.34	1.62	1.93
Northern Trust International Quality Dividend Index SM Return	-13.86	-18.34	-19.02	0.28	0.45	1.82	2.18
MSCI AC World ex USA Index Return	-13.73	-18.42	-19.42	1.35	2.50	2.92	3.31

Index performance returns do not reflect any fees, transaction costs, expenses or taxes.

Extraordinary performance is attributable in part due to unusually favorable market conditions and may not be repeated or consistently achieved in the future. Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed or sold in the secondary market, may be worth more or less than the original cost. Investors will incur usual and customary brokerage commissions when buying or selling shares of the exchange-traded funds ("ETFs") in the secondary market, and that, if reflected, the brokerage commissions would reduce the performance returns. Current performance may be lower or higher than the performance shown. Shares are bought and sold at market price not net asset value ("NAV") and are not individually redeemable from the fund. For the most recent month-end performance, please visit the Fund's website at www.flexshares.com or call 855-353-9383 for more information.

Index performance does not represent FlexShares fund performance. It is not possible to invest directly in an index. All performance figures assume reinvestment of dividend and capital gains at net asset value; actual returns may differ. Performance 1-year and less are cumulative; performance over 1-year are average annualized total returns. Market price performance is determined using the bid/ask midpoint at 4:00pm Eastern time, when the NAV is typically calculated. NAV price performance is determined using the daily calculated NAV. They do not represent the returns you would receive if you traded shares at other times. Performance figures do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or upon redemption or sale of fund shares. The fund inception date is generally several days prior to when the fund begins trading. NAV prices are used to calculate market price performance prior to 4/16/2013, when the fund first traded on an exchange.

Northern Trust Investments, Inc. ("NTI" or the "Adviser") has contractually agreed to reimburse a portion of the operating expenses of the Fund (other than Acquired Fund Fees and Expenses) to the extent the "Total Annual Fund Operating Expenses" exceed 0.47% until March 1, 2023. Performance would have been lower without fee waivers and expense reimbursements in effect.

Northern Trust International Quality Dividend Index tracks a portfolio of long-only international securities issued by non-U.S.-based companies, with an emphasis on long-term capital growth and a targeted overall beta that is similar to that of the Northern Trust International Large Cap Index.

MSCI AC World ex USA Index captures large and mid cap representation across 22 of 23 Developed Markets (DM) countries excluding the United States.

DISCLOSURES

Before investing, carefully consider the FlexShares investment objectives, risks, charges and expenses. This and other information are in the prospectus and summary prospectus, copies of which may be obtained by visiting www.flexshares.com. Read the prospectus carefully before you invest.

Foreside Fund Services, LLC, distributor.

An investment in FlexShares is subject to numerous risks, including possible loss of principal. Fund returns may not match the return of the respective indexes. A full description of risks are in the prospectus and summary prospectus.

FlexShares International Quality Dividend Index Fund (IQDF) is passively managed and uses a representative sampling strategy to track its underlying index. Use of a representative sampling strategy creates tracking risk where the Fund's performance could vary substantially from the performance of the underlying index along with the risk of high portfolio turnover. Additionally, the Fund is at increased dividend risk, as the issuers of the underlying stock might not declare a dividend, or the dividend rate may not remain at current levels. The Fund is also at increased risk of industry concentration, where it may be more than 25% invested in the assets of a single industry. Investments in foreign market securities involve certain risks such as currency volatility, political and social instability and reduced market liquidity. To the extent that the Fund invests in Emerging markets, those investments may be subject to increased price volatility and may be more susceptible to adverse economic, market, political or regulatory occurrences affecting that country, market, industry, sector or asset class. The Fund may be more susceptible to adverse economic, market, political or regulatory occurrences affecting that country, market, industry, sector or asset class. Finally, the Fund may also be subject to increased volatility risk, where volatility may not equal the target of the underlying index.

Price to Earnings is calculated as a company's current stock price divided by its earnings per share. Price to Book is calculated as the market value of all common stock shares of a company divided by the book value of the company.
