

Direxion Daily 20+ Year Treasury Bull and Bear 3X Shares

Overview

The [Direxion Daily 20+ Year Treasury Bull & Bear 3X Shares](#) seek daily investment results, before fees and expenses, of 300%, or 300% of the inverse (or opposite), of the performance of the ICE U.S. Treasury 20+ Year Bond Index. **There is no guarantee the funds will meet their stated investment objectives.**

These leveraged ETFs seek a return that is 300% or -300% of the return of their benchmark index **for a single day**. The funds should not be expected to provide three times or negative three times the return of the benchmark's cumulative return for periods greater than a day.

Target Index

The ICE U.S. Treasury 20+ Year Bond Index (IDCOT204) is a market value weighted index that includes publicly issued U.S. Treasury securities that have a remaining maturity of greater than 20 years. Eligible securities must be fixed rate, denominated in U.S. dollars, and have \$300 million or more of outstanding face value, excluding amounts held by the Federal Reserve. Securities excluded from the Index are inflation-linked securities, Treasury bills, cash management bills, any government agency debt issued with or without a government guarantee and zero-coupon issues that have been stripped from coupon-paying bonds. **One cannot directly invest in an index.**

Investing in a Direxion Shares ETF may be more volatile than investing in broadly diversified funds. The use of leverage by a Fund increases the risk to the Fund. The Direxion Shares ETFs are not suitable for all investors and should be utilized only by sophisticated investors who understand leverage risk, consequences of seeking daily leveraged, or daily inverse leveraged, investment results and intend to actively monitor and manage their investment.

*The Net Expense Ratio includes management fees, other operating expenses and Acquired Fund Fees and Expenses. If Acquired Fund Fees and Expenses were excluded, the Net Expense Ratio would be 0.88% for TMF and TMV. The Fund's adviser, Rafferty Asset Management, LLC ("Rafferty") has entered into an Operating Expense Limitation Agreement with the Fund. Under the Operating Expense Limitation Agreement, Rafferty has contractually agreed to waive all or a portion of its management fee and/or reimburse the Fund for Other Expenses through September 1, 2023, to the extent that the Fund's Total Annual Fund Operating Expenses exceed 0.95% of the Fund's average daily net assets (excluding, as applicable, among other expenses, taxes, swap financing and related costs, acquired fund fees and expenses, dividends or interest on short positions, other interest expenses, brokerage commissions and extraordinary expenses). If these expenses were included, the expense ratio would be higher.

Index Statistics

Effective Duration	17.48
Weighted Average Maturity	25.94
Weighted Average Coupon	2.5
30 Day Volatility	22.08

Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. Duration is expressed as a number of years.

The **weighted average maturity** of the time until all maturities on treasuries in the index. The higher the weighted average to maturity, the longer the bonds have in the index until maturity.

The **weighted average coupon** of the index is arrived at by weighting the coupon of each bond by its relative size in the portfolio.

Volatility is a measurement of risk based on daily volatility of price over the last 30 days of the period calculated using standard deviation.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds' website at direxion.com.

Short-term performance, in particular, is not a good indication of a fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.
