Cost-effective exposure to high-quality mega-cap companies

- Mega-caps have been a powerful source of return because they typically have: durable balance sheets, liquidity, and strong brands.
- High quality profile provides an element of durability and stability during volatile markets.
- Active, rules-based framework helps ensure a consistent approach is implemented through different market cycles.

Active, rules-based framework

S&P 500 Index is a market-capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market. Investors cannot invest directly in an index.

Why allocate to a portfolio:

- Mega-caps can enhance portfolio quality and stability and may be underrepresented in many investor portfolios.
- Lower cost relative to traditional actively managed mutual funds.

Performance data quoted represents past performance. Past performance is no guarantee of future results and investment returns, and principal value of the Fund will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Visit PrincipalETFs.com for current month-end performance.

⁴ S&P 500® Index is a market-capitalization-weighted index of 500 widely held stocks often used as a proxy for the stock market.

⁵ Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

⁶ The net expense ratio reflects contractual expense limits, if any, which may lower net expenses and cause the gross and net expense ratios to differ. In such cases a date is listed through which expense limits are expected to apply; however, Principal Exchange-Traded Funds and the investment adviser may mutually agree to terminate the expense limits prior to the end of the period. Returns displayed are based on net total investment expense.

⁷ 30-Day SEC yield represents net investment income earned by a fund over a 30-day period, stated as an annual percentage. Unsubsidized yield reflects the SEC yield when some fund expenses are not waived. Subsidized yield reflects a fund's yield when all expense waivers are included.

⁸ As of October 3, 2022. The distribution yield is calculated by annualizing actual dividends distributed for the dividend period (monthly, quarterly, etc.) ending on the most recent dividend distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.

Active share: Measures how different portfolio weights in securities are from benchmark weights. The higher the active share, the more the portfolio differs from the benchmark.

Beta: Measures a portfolio's sensitivity to market movements. **Standard deviation:** Measures how widely portfolio returns have varied. **Sharpe ratio:** Measures how an investment balances risks and rewards. The higher the Sharpe ratio, the better the investment's historical risk-adjusted performance.

Returns shown for periods of less than one year are not annualized. The portfolio re-balances annually and may not reflect current allocations.

Risks

Asset allocation and diversification do not ensure a profit or protect against a loss. Investing in ETFs involves risk, including possible loss of principal. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance.

Investor shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Ordinary brokerage commissions apply.

Equity investments involve greater risk, including heightened volatility, than fixed-income investments. Unlike typical ETFs, there are no indices that the Principal U.S. Mega-Cap ETF attempts to track or replicate. Thus, the ability of the Fund to achieve its objectives will depend on the effectiveness of the portfolio manager.

Carefully consider a fund's objectives, risks, charges, and expenses. This material must be preceded or accompanied by a prospectus. Please read it carefully before investing.
