

### REASONS TO CONSIDER

#### Invest in Values

CATH excludes companies involved in activities perceived to be inconsistent with Catholic values as set out by the U.S. Conference of Catholic Bishops, including screens for weaponry and child labor.

#### Minimize Tracking Error

By providing exposure only to companies engaged in activities consistent with Catholic beliefs (through the S&P 500 Catholic Values Index), CATH seeks to minimize tracking error by matching the sector weightings of the broader S&P 500.

#### ETF Efficiency

CATH allows investors to buy and sell a broad basket of U.S. equities that conform with Catholic guidelines, with the tax efficiency of an ETF.

Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. ## DEFINITIONS

S&P 500 Catholic Values Index	The S&P 500 Catholic Values Index applies exclusion criteria to the constituents of the S&P 500 in order to create a benchmark aligned with Catholic values. These values are consistent with the Socially Responsible Investment Guidelines outlined by the United States Conference of Catholic Bishops (USCCB). The index is designed for investors who wish to track a benchmark that is consistent with USCCB guidelines.
S&P 500 Index	S&P 500 Index tracks the performance of 500 leading U.S. stocks and captures approximately 80% coverage of available U.S. market capitalization. It is widely regarded as the best single gauge of large-cap U.S. equities.

Investing involves risk, including the possible loss of principal. CATH's consideration of the Guidelines in its investment process may result in choices not to purchase, or sell, otherwise profitable investments in companies that have been identified as being in conflict with the Guidelines. This means that the Fund may underperform other similar funds that do not consider the Guidelines when making investment decisions. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
