Hypothetical Growth of \$10,000

As Of 12/30/2022

A hypothetical \$10,000 investment made in the fund ten years ago, or on commencement of operations for funds lacking a ten-year track record. Figures show monthly returns and include reinvestment of dividends and capital gains but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

Investment Objective

Seeks capital appreciation.

Strategy

Investing primarily in companies engaged in the research, development, manufacture, distribution, supply, or sale of industrial products, services, or equipment. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

Risk

Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Industrials industries can be significantly affected by general economic trends, changes in consumer sentiment and spending, commodity prices, legislation, government regulation and spending, import controls, and worldwide competition, and can be subject to liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund may have additional volatility because of its narrow concentration in a specific industry. Non-diversified funds that focus on a relatively small number of stocks tend to be more volatile than diversified funds and the market as a whole.
