GROWTH OF \$10,000

Based on a hypothetical Class A Share investment of \$10,000 on 12/27/2001, at net asset value and includes the reinvestment of all distributions. Data as of 12/31/2022.

CALENDAR YEAR TOTAL RETURNS AT NAV (%)

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
NAV	27.96	11.56	-2.38	15.13	19.09	-4.73	26.58	15.50	25.67	-13.53

Reflects the percent change in net asset value (NAV) of Class A shares and includes the reinvestment of all distributions. Performance is shown for each calendar year. Performance of Class A shares with sales charge reflects the reinvestment of all distributions and includes initial maximum sales charge. Certain purchases of Class A shares without a sales charge are subject to a contingent deferred sales charge (CDSC). The CDSC is not reflected in the performance shown. Returns for less than one year are not annualized. Instances of high double-digit returns were achieved primarily during favorable market conditions and may not be sustainable over time.

Effective April 1, 2020 the Lord Abbett Calibrated Dividend Growth Fund changed its name to Lord Abbett Dividend Growth Fund. There was no change to the Fund's investment strategy. Effective September 27, 2012, the Lord Abbett Capital Structure Fund changed its name to Lord Abbett Calibrated Dividend Growth Fund, and the Fund transitioned its investment approach from investing in a mix of equity and fixed income securities to a domestic dividend oriented equity strategy. Therefore, the performance of the Fund for periods prior to September 27, 2012 is not representative of the Fund's current investment strategy. The change in investment approach may affect the Fund's performance.

Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The investment return and principal value of an investment in the Fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. You can obtain performance data current to the most recent month-end by calling Lord Abbett at 888-522-2388 or referring to lordabbett.com.

¹Reflects expenses for the Fund's fiscal year end and is subject to change. Fund expenses may fluctuate with market volatility. A substantial reduction in Fund assets (since its most recently completed fiscal year), whether caused by market conditions or significant redemptions or both, will likely cause total operating expenses (as a percentage of Fund assets) to become higher than those shown.

²Reflects the average net expenses of Class A shares of all funds within the Lipper Equity Income Funds Category based on Lipper data available.

A Note about Risk: The value of investments in equity securities will fluctuate in response to general economic conditions and to changes in the prospects of particular companies, including market, liquidity, currency, and political risks. Mid cap company stocks tend to be more volatile and may be less liquid than large cap company stocks. Mid cap companies typically experience a higher risk of failure than large cap companies. However, larger companies may be unable to respond quickly to certain market developments and may have slower rates of growth as compared to smaller successful companies. A company's dividend payments may vary over time, and there is no guarantee that a company will pay a dividend at all. These factors can adversely affect Fund performance.

The Fund's portfolio is actively managed and is subject to change.

[†]The net expense ratio for Class F takes into account a contractual fee waiver agreement currently scheduled to remain in place through 03/31/2023 of the Fund's 0.10% Rule 12b-1 fee. For periods when fees or expenses were waived and/or reimbursed, the share class benefited by not bearing such expenses. Without such waivers, performance would have been lower.
