

JPMorgan International Research Enhanced Equity ETF

Ticker: JIRE

Designed to provide long-term capital appreciation.

Approach

- Invests primarily in companies domiciled in foreign developed markets
- May modestly overweight equity securities that it considers undervalued while modestly underweighting or not holding equity securities that appear overvalued
- Seeks to outperform the MSCI Europe, Australasia, Far East (EAFE) Index over time while maintaining similar risk characteristics, including sector and geographic risks

Ratings

Morningstar Star Rating	12/31/22
Overall Morningstar Rating™	★ ★ ★
Morningstar Category™	Foreign Large Blend

Overall Morningstar ratings 3 stars; 704 funds. Three year rating 3 stars; 704 funds. Five year rating 3 stars; 611 funds. Ten year rating 3 stars; 422 funds. Ratings reflect risk-adjusted performance. Different share classes may have different ratings.

Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics.

Performance Disclosures
The performance quoted is past performance and is not a guarantee of future results. Investment returns and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than original cost. Current performance may be higher or lower than the performance data shown. For performance current to the most recent month-end please call 1-844-4JPM-ETF.

Predecessor Mutual Fund Inception Date: 10/28/1992

Prior to close of business 6/10/2022, the quoted performance for the ETF includes performance of a predecessor mutual fund/R6 share class prior to the ETF's commencement of operations. Please refer to the current prospectus for further information.

Total Returns based on NAV and Market Price do not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund.

†12-month dividend yield is calculated by dividing the dividend per share by the net asset value per share as of the reported date. 12-month dividend yield represents the sum of the monthly dividend yields for the previous 12 months.

A fund's NAV is the sum of all its assets less any liabilities, divided by the number of shares outstanding.

YTD returns are as of the last business day of the month.

As of 6/30/14, the Fund changed its name, investment objective, certain investment policies and benchmark. In view of these changes, the Fund's performance record prior to 6/30/14 might be less pertinent for investors considering whether to purchase shares of the Fund.

Must be preceded or accompanied by a prospectus.

Performance

- F1** Fund: at NAV
- F2** Fund: Market price returns
- B** Benchmark: MSCI EAFE Index (net total return)

Growth of \$10,000

Since inception with dividends and capital gains reinvested. There is no direct correlation between a hypothetical investment and the anticipated performance of the Fund.

Performance Disclosures
Prior to close of business on 6/10/2022, the Fund operated as an open-end mutual fund. The Fund has an identical investment objective and substantially similar investment strategies and investment risk profiles as the predecessor mutual fund. The NAV returns include returns of the Class R6 Shares of the predecessor mutual fund prior to the Fund's commencement of operations. Performance for the Fund's Shares has not been adjusted to reflect the Fund's Shares' lower expenses than those of the predecessor mutual fund's Class R6 Shares. Had the predecessor fund been structured as an exchange-traded fund, its performance may have differed. Please refer to the current prospectus for further information.

Prior to close of business on 6/10/2022, the Fund operated as an open-end mutual fund. Market price returns are calculated using the official closing price of the Fund on the listing exchange as of the time that the Fund's NAV is calculated. Prior to the Fund's listing on 6/13/2022, the NAV performance of the Fund and the Class R6 Shares of the predecessor mutual fund are used as proxy market price returns. The Fund's market price returns have not been adjusted to reflect the lower expenses of the Fund than those of the predecessor mutual fund's Class R6 Shares. Had the predecessor mutual fund been structured as an exchange-traded fund, its performance may have differed. Please refer to the current prospectus for further information.

Investors should carefully consider the investment objectives and risks as well as charges and expenses of the JPMorgan ETF before investing. The summary and full prospectuses contain this and other information about the ETF. Read the prospectus carefully before investing. Call 1-844-4JPM-ETF or visit www.jpmorgansETFs.com to obtain a prospectus.

Due to rounding, values may not total 100%.

This document is a general communication being provided for informational purposes only. It is educational in nature and not designed to be a recommendation for any specific investment product, strategy, plan feature or other purpose. Any examples used are generic, hypothetical and for illustration purposes only. Prior to making any investment or financial decisions, an investor should seek individualized advice from personal financial, legal, tax and other professionals that take into account all of the particular facts and circumstances of an investor's own situation. Sector and country or region excludes cash.

This Fund integrates financially material Environmental, Social and Governance ("ESG") factors as part of its investment decision-making process ("ESG Integration"). ESG Integration is the systematic inclusion of ESG issues in investment analysis and investment decisions. ESG Integration for a Fund is dependent upon the availability of sufficient ESG information on the Fund's investment universe. ESG determinations may not be conclusive and securities of companies/issuers may be purchased and retained, without limit, by the adviser regardless of potential ESG impact. The impact of ESG Integration on a Fund's performance is not specifically measurable as investment decisions are discretionary regardless of ESG considerations.

Risk Summary

International investing has a greater degree of risk and increased volatility due to political and economic instability of some overseas markets. Changes in currency exchange rates and different accounting and taxation policies outside the U.S. can affect returns.

Annual Operating Expenses

The Fund's adviser and/or its affiliates have contractually agreed to waive fees and/or reimburse expenses to the extent Total Annual Fund Operating Expenses (excluding Acquired Fund Fees and Expenses other than certain money market fund fees, dividend and interest expenses related to short sales, interest, taxes, expenses related to litigation and potential litigation, costs of shareholder meetings, and extraordinary expenses) exceed 0.25% of the average daily net assets of the Fund. The Fund may invest in one or more money market funds advised by the adviser or its affiliates (affiliated money market funds). The Fund's adviser has contractually agreed to waive fees and/or reimburse expenses in an amount sufficient to offset the fees and expenses of the affiliated money market funds incurred by the Fund because of the Fund's investment in such money market funds. These waivers are in effect through 06/30/2025, at which time it will be determined whether such waivers will be renewed or revised. To the extent that the Fund engages in securities lending, affiliated money market fund fees and expenses resulting from the Fund's investment of cash received from securities lending borrowers are not included in Total Annual Fund Operating Expenses and therefore, the above waivers do not apply to such investments.

Indexes

ETFs have fees that reduce their performance: indexes do not. You cannot invest directly in an index.

The MSCI EAFE (Europe, Australia, Far East) Index (net total return) is a free float-adjusted market capitalization weighted index that is designed to measure the performance of large- and mid- cap stocks in developed markets, excluding the U.S. and Canada. Net total return figures assume the reinvestment of dividends after deduction of withholding tax, applying

the maximum rate to nonresident individual investors who do not benefit from double taxation treaties.

Top Holdings

The top 10 holdings listed exclude cash and money markets. Holdings are subject to change. The holdings listed should not be considered recommendations to purchase or sell a particular security. Each individual security is calculated as a percentage of the net assets.

Ratings and Awards

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10- year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Rankings do not take sales loads into account.

Definitions

30-day SEC Yield: Represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. The 30-day yield should be regarded as an estimate of investment income and may not equal the fund's actual income distribution rate.

30-day SEC Yield (unsubsidized): Unsubsidized yield does not adjust for any fee waivers and/or expense reimbursements.

Beta measures a fund's volatility in comparison to the market as a whole. A beta of 1.00 indicates a fund has been exactly as volatile as the market.

P/E ratio is the number by which earnings per share is multiplied to estimate a stock's value.

Weighted average market capitalization is a stock market index weighted by the market capitalization of each stock in the index.

Entities

J.P. Morgan ETFs are distributed by JPMorgan Distribution Services, Inc., which is an affiliate of JPMorgan Chase & Co. Affiliates of JPMorgan Chase & Co. receive fees for providing various services to the funds. JPMorgan Distribution Services, Inc. is a member of FINRA.
