Seeks long-term capital appreciation

Companies, Not Countries

The team builds the portfolio one company at a time by looking for stocks in local markets that are trading at a discount, but have the potential to generate strong returns. This allows them to focus on the merits of each investment rather than region or sector allocation, seeking to deliver strong outperformance through stock selection.

ESG Focus

The Fund uses a proprietary framework to identify and invest in a selective portfolio of companies that satisfy the Fund's Environmental, Social and Governance (ESG) criteria. By incorporating ESG criteria and an active ownership approach, the Fund seeks to manage risk from an ESG perspective and invest in sustainable businesses trading at attractive valuations that may generate excess returns over the benchmark.

Integrated Global Network

GS Asset Management's global equity team draws from a pool of ~80 investors with an average of 15 years of experience across 6 global offices. The team leverages a deep network of resources around the world allowing for local expertise with centralized decision making - a capability that may uncover opportunities overlooked by smaller asset managers.

Total Returns at NAV (%)

■ Class I ■ MSCI EAFE (net)

Average Annual Total Returns (%)

Below are the fund's average annual total returns with all distributions reinvested for periods ended 12.30.22

(as of 12/30/2022)	1 Year	5 Years	10 Years
NAV	-17.45%	5.39%	6.23%

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: www.GSAMFUNDS.com to obtain the most recent month-end returns.

The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least February 28, 2023, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees.

Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions.

Rankings for other share classes may vary.

The Net Asset Value (NAV) is the market value of one share of the Fund. Percentages may not sum to 100% due to rounding.

All or a portion of the Fund's distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information. Distributions from net investment income and distributions from net capital gains, if any, are normally declared and paid annually.

Morningstar Risk-Adjusted Ratings: Foreign Large Blend Category- Class I Shares 3 Year 5 stars out of 704 funds, 5 Year 5 stars out of 611 funds, 10 year 5 stars out of 422 funds. The Morningstar Rating[®] is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months.

About Us

Goldman Sachs Asset Management, the asset management arm of The Goldman Sachs Group, Inc., is among the world's largest asset managers, with \$2.20 trillion in assets under supervision (AUS) as of 9.30.22

Founded in 1869, Goldman Sachs is a leading global investment banking, securities and investment management firm.

Benefit from the diverse and experienced Global Equity Team

Ideas are assessed from the bottom-up, on a company-by-company basis. A significant emphasis is put on stocks with high growth potential that are trading at attractive valuations and provide access to secular themes. This allows us to focus on the merits of each investment rather than country or sector allocation.

The Goldman Sachs International Equity ESG Fund invests primarily in a diversified portfolio of equity investments in non-U.S. issuers that the Investment Adviser believes adhere to the Fund's environmental, social and governance ("ESG") criteria. The Fund's adherence to its ESG criteria and the application of the Investment Adviser's supplemental ESG analysis may affect the Fund's performance relative to similar funds that do not adhere to such criteria or apply such analysis. The Fund's investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign and emerging markets investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. Such securities are also subject to **foreign custody risk**. Because the Fund may invest in a **relatively small number of issuers**, the Fund is subject to greater risk of loss. Because the Fund may invest heavily in **specific sectors**, the Fund is subject to greater risk of loss as a result of adverse economic, business or other developments affecting such sectors.

The MSCI EAFE Index (unhedged) is a market capitalization weighted composite of securities in 21 developed markets as of April 30, 2019. The Index is unmanaged and the figures do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

The Fund's since inception performance begins at \$10,000, assumes reinvestment of dividends and does not reflect sales charges.

The Weighted Average Market Cap represents the average value of the companies in the index or portfolio. The Weighted Median Market Cap provides the middle market capitalization level in the index or portfolio. Companies with a larger market capitalization have a greater impact on both calculations.

Lipper Total Return Rankings - Lipper Analytical Services, Inc., an independent publisher of mutual fund rankings, records rankings for these and other Goldman Sachs Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on **total return** at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return. Data as of 12.31.22.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion.

Correlation Measure - R-squared: Measures how closely the historical movement of a portfolio's returns relates to a particular market index over a specified time period. **Risk Measures** - Standard Deviation: Measures the historical total risk of a portfolio by assessing the probable range within which a portfolio's return could deviate from its average return over a defined historical period of time. Beta: Measures the historical market risk of a portfolio or the volatility of a portfolio relative to an underlying index over a defined historical period of time.
