INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in Latin America.

Favor companies with attractive valuations and earnings that are growing faster than their local, regional peers.

Identify themes/trends and industries that are likely to experience high future growth.

Securities are chosen based on bottom-up research, supported by a top-down perspective.

Country allocation is driven by stock selection.

BENEFITS AND RISKS

Broad investment opportunity offering exposure to a rapidly evolving region.

Over long periods, emerging markets investing offers diversification benefits relative to an all-U.S. portfolio.

International investments are generally more volatile than domestic investments.

Investing internationally involves special risks including economic and political uncertainty and currency fluctuation. These risks are typically heightened for investments in emerging markets.

CUMULATIVE RETURNS
