

Invesco BLDRS Emerging Markets 50 ADR Index Fund

Fund description

The Invesco BLDRS Emerging Markets 50 ADR Index Fund (Fund) is based on the S&P Emerging 50 ADR Index (Index). The Fund normally holds at least 95% of its total assets in depositary receipts (DR) that comprise the Index. The Index is capitalization-weighted and designed to track the performance of approximately 50 emerging market-based DRs. The Fund and the Index are rebalanced and reconstituted quarterly.

The Fund is an "index fund" that holds publicly traded DRs, negotiable U.S. securities that generally represent a non-U.S. company's publicly traded equity or debt, of non-U.S. companies in a particular geographic region or market represented by a specified relevant benchmark S&P ADR Composite Index.

Returns less than one year are cumulative. Performance data quoted represents past performance. Past performance is not a guarantee of future results; current performance may be higher or lower than performance quoted. Investment returns and principal value will fluctuate and Shares, when redeemed, may be worth more or less than their original cost. See [invesco.com](https://www.invesco.com) to find the most recent month-end performance numbers. Market returns are based on the midpoint of the bid/ask spread at 4 p.m. ET and do not represent the returns an investor would receive if shares were traded at other times. Fund performance reflects fee waivers, absent which, performance data quoted would have been lower. Please keep in mind that high, double-digit and/or triple-digit returns are highly unusual and cannot be sustained.

Index returns do not represent Fund returns. An investor cannot invest directly in an index. Neither the underlying Index nor the benchmark indexes charge management fees or brokerage expenses, and no such fees or expenses were deducted from the performance shown; nor do any of the indexes lend securities, and no revenues from securities lending were added to the performance shown. In addition, the results actual investors might have achieved would have differed from those shown because of differences in the timing, amounts of their investments, and fees and expenses associated with an investment in the Fund. S&P ADR Composite Index seeks to track all American depositary receipts trading on the NYSE, NYSE American, and NASDAQ, subject to minimum size and liquidity requirements.

¹MSCI Emerging Markets Index is an unmanaged index considered representative of stocks of developing countries. The index is computed using the net return, which withholds applicable taxes for non-resident investors.

²The MSCI EAFE® Index is an unmanaged index considered representative of stocks of Europe, Australasia and the Far East. The index is computed using the net return, which withholds applicable taxes for non-resident investors.

Investment risks

There are risks involved with investing in ETFs, including possible loss of money. Shares are not actively managed and are subject to risks similar to those of stocks, including those regarding short selling and margin maintenance requirements. Ordinary brokerage commissions apply. The Fund's return may not match the return of the Underlying Index. The Fund is subject to certain other risks. Please see the current prospectus for more information regarding the risk associated with an investment in the Fund.

The Fund may hold illiquid securities that it may be unable to sell at the preferred time or price and could lose its entire investment in such securities.

The Fund may invest in foreign markets and because foreign exchanges may be open on days when the Fund does not price its shares, the value of the non-US securities in the Fund's portfolio may change on days when you will not be able to purchase or sell your shares.

Investing in securities of Chinese companies involves additional risks, including, but not limited to: the economy of China differs, often unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, allocation of resources and capital reinvestment, among others; the central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership; and actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China.

The MSCI Emerging Markets Index and the MSCI EAFE® Index are unmanaged indexes considered representative of stocks of developing countries; and stocks of Europe, Australasia and the Far East, respectively. These indexes are computed using the net return, which withholds applicable taxes for non-resident investors. S&P ADR Composite Index seeks to track all American depositary receipts trading on the NYSE, NYSE American, and NASDAQ, subject to minimum size and liquidity requirements.

Depository receipts involve many of the same risks as a direct investment in foreign securities, and issuers of certain depository receipts are under no obligation to distribute shareholder communications to the holders or to pass through to them any voting rights with respect to the deposited securities.

The risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, political and economic instability, and foreign taxation issues.

The Sponsor may direct the Trustee to terminate and liquidate the Fund - See "Termination of a Fund" in the prospectus for further information. In the event the Fund is terminated, the trading pattern of the Fund's Shares could be negatively affected.

The Fund is non-diversified and may experience greater volatility than a more diversified investment.

Glossary

30 Day SEC Unsubsidized Yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses. Total return would have also been lower in the absence of these temporary reimbursements or waivers.

30 Day SEC Yield is based on a 30-day period and is computed by dividing the net investment income per share earned during the period by the maximum offering price per share on the last day of the period.

Intraday NAV is a symbol representing estimated fair value based on the most recent intraday price of underlying assets.

Weighted Harmonic Average Stock Price-to-Book-Value Ratio (P/B Ratio) is the ratio of a stock's market price to a company's net asset value.

Weighted Harmonic Average Stock Price-to-Earnings Ratio (P/E Ratio) is the share price divided by earnings per share. It is measured on a 12-month trailing basis.

Weighted Average Return on Equity is net income divided by net worth.

Weighted Market Capitalization is the sum of each underlying securities market value.
