A Word About Risk

All investments involve risks, including possible loss of principal. Funds whose investments are concentrated in foreign countries may be subject to fluctuating currency values, different accounting standards, and economic and political instability. The value of the Series may be affected by changes in exchange rates between foreign currencies and the U.S. dollar. Investments in emerging markets may be more volatile than investments in more developed markets.

Performance data quoted represents past performance and does not guarantee future results. Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863.

Returns shown include a one-time payment unrelated to the Fund's current portfolio investments received by the Fund during the third quarter 2020. The payment added approximately 3.6% to the Fund's performance in calendar year 2020. The portion of the Fund's average annual return attributable to the proceeds will vary by time frame.

Prior to 07/10/2002, all performance figures reflect the performance of the Exeter Trust Company Group Trust for Employee Benefit Plans: International Collective Investment Trust (the Collective), which was managed by Manning & Napier Advisors, Inc. (predecessor to Manning & Napier Advisors, LLC), an affiliate of the distributor, and reorganized into the Manning & Napier Fund, Inc. Overseas Series on 07/10/2002. The Collective was not open to the public generally or registered under the Investment Company Act of 1940 and the fees of the Collective were lower than the Series' fees.

Therefore, the historical performance of the Collective would have been lower if the Collective had been subject to the same fees as the Series. Returns shown include a one-time payment unrelated to the Fund's current portfolio investments received by the Fund during the third quarter 2020. The payment added approximately 3.6% to the Fund's performance in calendar year 2020. The portion of the Fund's average annual return attributable to the proceeds will vary by time frame.

The MSCI EAFE Index (EAFE) is a free float-adjusted market capitalization index designed to measure large and mid-cap representation across 21 Developed Markets countries (excluding the U.S. and Canada). The Index returns do not reflect any fees or expenses. The Index is denominated in U.S. dollars. The Index returns assume daily investment of gross dividends (which do not account for applicable dividend taxation) prior to 12/31/1998, as net returns were not available. Subsequent to 12/31/1998, the Index returns are net of withholding taxes. They assume daily reinvestment of net dividends thus accounting for any applicable dividend taxation.
