| Minimum Purchase | \$2,500 |

*Calculated such that all securities issued by one issuer are counted as one position.

Portfolio Allocation

| | |
|---------------------------|-------|
| Common Stocks | 85.6% |
| Cash and Cash Equivalents | 13.6% |
| Investment Company | 0.8% |

Spin-off and Corporate Restructuring Fund Overview

- U.S. focused global all-cap fund comprised of investments in:
 - Spin-off companies and parent companies of spin-offs.
 - Subsidiary companies resulting from an equity "carve out" or "partial initial public offering" where a parent company sells equity of such subsidiary.
 - Companies subject to a corporate restructuring, or public shareholder activist holding companies which cause other companies to undergo a spin-off or corporate restructuring.
- Return potential is often the result of the market's inefficiency in initially valuing these securities, due in part to the lack of coverage by the investment community, lack of a natural shareholder base immediately following the transaction, and resulting initial, indiscriminate selling pressure.

Performance (Institutional Class)*

| | Annualized Returns as of 12/31/22 | | | | | | |
|---------------|-----------------------------------|---------|---------|--------|--------|--------|-----------------|
| | 3 Month | YTD | 1YR | 3YR | 5YR | 10YR | Since Inception |
| Fund (LSHUX) | 23.33% | 39.82% | 39.82% | 28.27% | 20.64% | 14.91% | 7.20% |
| S&P 500 Index | 7.56% | -18.11% | -18.11% | 7.66% | 9.42% | 12.56% | 8.35% |

The Spin-off and Corporate Restructuring Fund Institutional Class inception date is 7/11/07. Figures include changes in principal value, reinvested dividends and capital gains distributions. Performance data quoted represents past performance and does not guarantee future results. Investment return and principal value will vary, and shares may be worth more or less at redemption than at original purchase. Call 1-800-930-3828 or visit us at www.kineticsfunds.com for the most recent month-end performance data. Current performance may be lower or higher than the performance data quoted. Performance data does not reflect the deduction of the sales load or fee which, if reflected, would reduce the performance quoted. You will be charged a redemption fee equal to 2.00% of the net amount of the redemption if you redeem or exchange your shares 30 days or less after you purchase them.

Definitions:

Active share: A measure of the percentage of holdings in a portfolio that differ from a benchmark index. It is calculated by taking the sum of the differences of the weight of each holding in the portfolio and the weight of each holding in the benchmark index and dividing by two. Active share is measured against the iShares S&P 500 ETF. **Beta:** A statistic that measures the volatility of the fund, as compared to the overall market. The market's beta is set at 1.00; therefore a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. It is important to note that a low beta for a fund does not necessarily imply that the fund has a low level of volatility, a low beta signifies only that the fund's market-related risk is low. **Down Market Capture Ratio:** A statistical measure of an investment manager's overall performance in down-markets. The down-market capture ratio is used to evaluate how well or poorly an investment manager performed relative to an index during periods when that index has dropped. The down-market capture ratio has been calculated since inception. **Median Market Capitalization:** The median market capitalization (value of outstanding shares) of a basket of stocks. **Price to Book Ratio:** The harmonic weighted average of the price/book (P/B) ratios of the equity securities referenced. The ratio calculated by dividing the current price of the stock by the company's book value per share (assets minus liabilities). **Price to Earnings Ratio:** The harmonic weighted average of the price/earnings (P/E) ratios of the equity securities referenced. The P/E ratio is calculated by dividing the current price of the stock by the trailing one year earnings. **Return on Equity:** The amount of net income returned as a percentage of shareholders equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. **Sharpe Ratio:** A statistical measure that uses standard deviation and excess return to determine reward per unit of risk. A higher Sharpe ratio implies a better historical risk-adjusted performance. The Sharpe ratio has been calculated since inception using the 3-month treasury bill for the risk-free rate of return. **Standard Deviation:** A statistical measure of portfolio risk used to measure variability of total return around an average, over a specified period of time. The greater the standard deviation over the period, the wider the variability or range of returns and hence, the greater the fund's volatility. The standard deviation has been calculated since inception. **Turnover Ratio:** A measure of how frequently assets within a fund are bought and sold by the managers represented over a one year period. **Up Market Capture Ratio:** A statistical measure of an investment manager's overall performance in up-markets. The up-market capture ratio is used to evaluate how well an investment manager performed relative to an index during periods when that index has risen. The up-market capture ratio has been calculated since inception. **Weighted Avg. Mkt. Cap:** The mean market capitalization (value of outstanding shares) of a basket of stocks, taking into account the relative weight of each investment.

The Gross expense ratios listed are as of 12/31/2021 as reported in the 4/30/2022 prospectus. The Fund's adviser voluntarily agreed to waive management fees and reimburse fund expenses so that net annual fund operating expenses do not exceed certain levels, not including acquired fund fees and expenses (AFFE), through May 1, 2023 and may be discontinued at any time by the Fund's adviser after May 1, 2023.

In April 2019, Kinetics Asset Management LLC ("KAM") and Kinetics Advisers, LLC ("KA") reorganized into Horizon Asset Management LLC ("HAM"), following which HAM was renamed Horizon Kinetics Asset Management LLC ("HKAM"). KAM, HAM and KA were all wholly-owned subsidiaries of Horizon Kinetics LLC, and HKAM will remain a wholly-owned subsidiary. HKAM is the Fund's adviser, previously, KAM was the Fund's adviser. Neither the portfolio managers of the Fund nor the Fund's investment objective and investment strategy have changed.

The Growth of \$10,000 chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund's Institutional Share Class commencement of operations (7/11/2007). It assumes reinvestment of capital gains and dividends. This chart is not intended to imply any future performance.

Holdings are expressed as a percentage of total net investments and may vary over time. Equity holdings are subject to change, and may not be indicative of actual market position due to the use of call and put options.

The Top 10 Industries and Top Countries displayed represent a percentage of the net assets and excludes cash equivalents and other assets in excess of liabilities.

You should consider the investment objectives, risks, charges and expenses of the fund carefully before investing. For a free copy of the fund's prospectus, which contains this and other information, visit our website at www.kineticsfunds.com or call 1-800-930-3828. You should read the prospectus carefully before you invest.

The Fund is classified as a non-diversified fund. Therefore, the value of its shares may fluctuate more than shares invested in a broader range of companies. In addition, investing in foreign securities involves more risk than just U.S. investments, including the risk of currency fluctuations, political and economic instability and differences in financial report standards. There may also be heightened risks investing in spin-off companies. Such companies are generally newly formed and may not have a track record upon which to evaluate management's experience or historical balance sheet information upon which to evaluate its financial strength. There are also risks associated with investing in small and medium sized companies whose share values may fluctuate more than larger companies. You should consult the Fund's prospectus for a complete list of risks associated with your investment.

S&P 500 Index statistics chart data is based on the iShares S&P 500 Index Fund for market cap, price to book, price to earnings, return on equity, and active share. iShares is a product of BlackRock, Inc.

The Standard & Poor's 500 Index represents an unmanaged, broad-based basket of stocks. It is typically used as a proxy for overall market performance. The S&P 500 Index returns assume that dividends are reinvested. An investor cannot invest directly in an index.
