Fund Sub-Advisor

Eagle Global Advisors ("Eagle") is owned by its employees. Eagle uses a team approach for the management of the International Fund, with each member of the team assuming responsibility for a geographic area of the globe and specific market sectors within that geographic area.

Objective

The investment objective of this Fund is to provide you with long-term growth of capital.

Strategy

- The Fund seeks to achieve its investment objectives by normally investing at least 80% of the Fund's total assets in the securities of foreign companies (companies domiciled in countries other than the United States), without regard to market capitalizations.
- The Fund invests its assets in companies which the Fund's Investment Manager believes show a high probability for superior growth. Companies that meet or exceed specific criteria established by the Manager in the selection process are purchased. Securities are sold when they reach internally determined pricing targets or no longer qualify under the Manager's investment criteria.
- The Fund allocates investments across countries and regions at the Manager's discretion. International funds, compared to domestic funds, have added risk from currency fluctuations, more rapid and extreme changes in value due to smaller market sizes, or from possible adverse political activities.

Fund Risk

This fund invests without regard to company size and each size, large, mid, and small may each result in greater risks than the other two. Foreign securities markets are sometimes relatively small, and subject to more extreme changes in value than are domestic markets. Foreign companies may be negatively impacted by the actions of foreign governments including nationalization, expropriation, confiscatory taxation, lack of regulatory controls, and political swings. Because the Timothy Plan Funds do not invest in excluded securities, the Funds may be riskier than other funds that invest in a broader array of securities. There are risks when a fund limits its investments to particular sized companies, and all companies are subject to market risk.

Investing involves risk, including the potential loss of principal.
