PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS. Investment return and principal value of an investment will fluctuate; therefore, an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted. Visit timothyplan.com for the most recent month-end performance.

The Russell 1000 Growth Index is a widely recognized, unmanaged index of 1000 large-capitalization companies in the U.S. The Index assumes reinvestment of all dividends and distributions and does not reflect any asset-based charges for investment management or other expenses. It is not possible to invest directly in an index.

The illustration is based on a hypothetical \$10,000 investment in A Class shares. All results shown assume reinvestment of dividends and capital gains. The maximum sales load on Class A shares is 5.5%; the maximum CDSC on Class C shares is 1%; Class I shares are no load shares which are available exclusively through registered investment advisors or for institutional accounts.

Fund Sub-Advisor

Chartwell Investment Partners ("Chartwell") is owned by its employees. Chartwell utilizes a team of investment professionals, who are responsible for the day-to-day recommendations regarding the investment of the portfolio.

Objective

The investment objective of this Fund is to provide you with long-term growth of capital.

Strategy

- The Fund seeks to achieve its investment objective by primarily investing at least 80% of the Fund's total assets in larger U.S. stocks. Larger stocks refer to the common stock of companies whose total market capitalization is generally greater than \$2 billion. Current income is not a significant investment consideration and any such income realized will be considered incidental to the Fund's investment objective.
- The Fund normally invests in a portfolio of securities which includes a broadly diversified number of common stocks that the Fund's Investment Manager believes show a high probability of superior prospects for above average growth.

Fund Risk

Investing in larger companies may result in greater risks than investing in smaller companies because the larger companies may not be able to react as quickly to changing market conditions as are smaller companies. Investing in mid-sized companies may result in greater risks than investing in larger companies because increased volatility and lower trade volume may result in lower relative prices when shares are sold. Investing in growth stocks may result in performance that is less than the market as a whole, and growth stocks may experience greater volatility than other stocks.

PLEASE SEE THE FUND PROSPECTUS FOR A COMPLETE EXPLANATION OF THE RISKS INVOLVED WITH EACH FUND. Risk chart is for illustrative purposes only.

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. To

BEFORE INVESTING, CAREFULLY CONSIDER THE FUND'S INVESTMENT OBJECTIVES, RISKS, CHARGES, AND EXPENSES OF THE INVESTMENT COMPANY. A PROSPECTUS IS AVAILABLE FROM THE FUND BY CALLING 800.846.7526, VISITING MF.TIMOTHYPLAN.COM, OR YOUR FINANCIAL PROFESSIONAL THAT CONTAINS THIS AND OTHER MORE COMPLETE, IMPORTANT INFORMATION. PLEASE READ IT CAREFULLY BEFORE INVESTING OR SENDING MONEY.

Because the Timothy Plan Funds do not invest in excluded securities, the Funds may be riskier than other funds that invest in a broader array of securities. There are risks when a fund limits its investments to particular sized companies, and all companies are subject to market risk.

Investing involves risk, including the potential loss of principal.
