HYPOTHETICAL GROWTH OF \$10,000 INVESTMENT SINCE INCEPTION

Class A without sales charge 11/13/2009 to 12/31/2022

The chart illustrates the performance of a hypothetical \$10,000 investment made in the fund on commencement of operations. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any applicable sales charges or redemption fees, which would lower these figures. This chart is not intended to imply any future performance of the fund.

The data shown represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see transamerica.com for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost. Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Public offering price (POP) returns include reinvestment of dividends and capital gains and reflect the maximum sales charge. Performance for other share classes will vary.

The Max Sales Charge for Class A shares is 5.50%. There are no sales charges for Class I shares. Class I shares are primarily offered for investment to institutional investors including, but not limited to, fee-based programs, pension plans, and certain endowment plans and foundations. The minimum investment for Class I shares is \$1,000,000 per fund account, but will be waived for certain investors.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager. Contractual arrangements, if any, have been made with Transamerica Asset Management, Inc. through 3/1/2023.

Risk measures are in comparison to the fund's primary benchmark unless otherwise indicated. Based on Class A for the 3-year period.

Alpha is a coefficient measuring the portion of a fund's return arising from specific (non-market) risk. Historical **Beta** illustrates a fund's sensitivity to price movements in relation to a benchmark index. **R-Squared** is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in a benchmark index. **Standard Deviation** is a statistical measurement that helps to gauge the fund's historical volatility. **Information Ratio** is a ratio of portfolio returns above those of a benchmark compared to the volatility of those returns. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. **Tracking Error** is the difference between the price behavior of a fund and the price behavior of a benchmark. **P/B Ratio** is the ratio of the fund's market price to the most recently reported book value for the prior fiscal year.

The Russell 1000® Growth Index is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses. "Russell®" and other service marks and trademarks related to the Russell indexes are trademarks of the London Stock Exchange Group companies.

The COVID-19 pandemic has caused substantial market disruption and dislocation around the world including the U.S. During periods of market disruption, which may trigger trading halts, the fund's exposure to the risks described elsewhere in the prospectus will likely increase. As a result, whether or not the fund invests in securities of issuers located in or with significant exposure to the countries directly affected, the value and liquidity of the fund's investments may be negatively affected.

Returns on growth stocks may not move in tandem with return on other categories of stocks or the market as a whole. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. Growth stocks as a group may be out of favor and underperform the overall equity market for a long period of time, for example, while the market favors "value" stocks.

Shares may be sold (or "redeemed") on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within two business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law.

Mutual funds are subject to market risk, including loss of principal. Past performance is not indicative of future results.

Mutual Funds are sold by prospectus. Before investing, consider the funds' investment objectives, risks, charges, and expenses. This and other important information is contained in the prospectus. Please visit transamerica.com or contact your financial professional to obtain a prospectus or, if available, a summary prospectus containing this information. Please read it carefully before investing.
