

Institutional Emerging Markets Portfolio

Fact Sheet | Institutional Class | Ticker: HLMEX | December 31, 2022

Objective

The Institutional Emerging Markets Portfolio seeks long-term capital appreciation through investments in equity securities of companies based in emerging markets.

Philosophy and Process

We believe a diversified portfolio of high-quality, durable-growth companies purchased at reasonable prices will provide superior investment returns with below-average risk over the long term. Our analysts conduct careful bottom-up research of individual companies and analyze the competitive dynamics of their industries to identify what we believe are the best growth companies and to assess the value of their shares. To qualify for investment, companies must be well-managed, financially strong, and possess clear competitive advantages relative to their peers.
