

EQL

ALPS Equal Sector Weight ETF

Fact Sheet | December 31, 2022

Description

The ALPS Equal Sector Weight ETF (EQL) is an ETF of ETFs that delivers exposure to the US Large Cap Equity market by investing **equal proportions in 11 Select Sector SPDRs** and rebalances quarterly. The 11 Sector SPDRs are shown in the Portfolio Composition chart on the lower right.

Equal Sector Advantages

EQL delivers moderate, yet meaningful exposure to every sector of the market, providing investors with the following potential advantages:

- **Diversification**[^]
- The opportunity to participate in a market **rally in any sector**
- **Reduction** in the negative impact of a crash in any individual sector
- **Transparent** sector allocations^{^^}

[^] Diversification does not eliminate the risk of experiencing investment losses.

^{^^} ETFs are transparent because holdings are disclosed on the website daily.

Performance as of 12/31/2022

Total Returns	Cumulative		Annualized				
	3 M	YTD	1 Y	3 Y	5 Y	10 Y	SI ¹
NAV (Net Asset Value)	9.39%	-10.58%	-10.58%	8.55%	8.98%	11.52%	12.80%
Market Price	9.38%	-10.51%	-10.51%	8.64%	8.98%	11.51%	12.82%
NYSE Equal Sector Weight Index - TR ²	9.44%	-10.48%	-10.48%	8.73%	9.27%	11.74%	13.06%
S&P 500 Index - TR ³	7.56%	-18.11%	-18.11%	7.66%	9.42%	12.56%	13.59%

Beta, Standard Deviation and Correlation Source: Bloomberg L.P., 36-month observations 12/31/2019-12/31/2022

Performance data quoted represents past performance. Past performance is no guarantee of future results so that shares, when redeemed, may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. For current month-end performance call 1-866-759-5679 or visit www.alpsfunds.com. Performance includes reinvested distributions and capital gains.

Market Price is based on the midpoint of the bid/ask spread at 4 p.m. ET and does not represent the returns an investor would receive if shares were traded at other times.

¹ Fund inception date: 7/6/2009

² NYSE Equal Sector Weight Index: consists of a strategy that holds all active Select Sector® SPDR® ETFs in an equal-weighted portfolio. One may not invest directly in an index.

³ S&P 500 Index: widely regarded as the best single gauge of large-cap US equities. The index includes 500 leading companies and covers approximately 80% of available market capitalization. One may not invest directly in an index.

⁴ Beta: a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market or a benchmark. The beta of the market or benchmark is 1.00 by definition. An investment with a beta above 1 is more volatile than the overall market, while an investment with a beta below 1 is less volatile.

⁵ Standard Deviation: a statistical measure that indicates the extent of deviation for a group as a whole. In the reference above, the standard deviation is the annual statistical measure of the historical volatility - the extent to which returns are spread around their average.

⁶ Correlation: a statistic that measures the degree to which two variables move in relation to each other.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus containing this and other information, call 1-866-759-5679 or visit www.alpsfunds.com. Read the prospectus carefully before investing.

Shares are not individually redeemable. Investors buy and sell shares on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 5,000, 25,000 or 50,000 shares.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

The Fund's investment performance, because it is a fund of funds, depends on the investment performance of the Underlying Sector ETFs in which it invests.

An investment in the Fund is subject to the risks associated with the Underlying Sector ETFs that comprise the Underlying Index. The Fund will indirectly pay a proportional share of the asset-based fees of the Underlying Sector ETFs in which it invests.

The Fund is considered nondiversified and as a result may experience greater volatility than a diversified fund.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.
