

REASONS TO CONSIDER

High Growth Potential

As consumer behaviors shift, the adoption of IoT enabled devices continues to rise. Forecasts suggest that increased adoption could potentially generate \$12bn in economic value by 2030, a nearly eightfold increase from 2020.⁽¹⁾

Structural Tailwinds

The realm of internet-enabled devices continues to expand to new categories, allowing manufacturers to monitor and service products via software upgrades.

Unconstrained Approach

The IoT spans multiple segments, and its most innovative companies include both household names and newcomers from around the world. SNSR invests accordingly, without regard for sector or geography.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. [Click here](#) for standard performance as of the most recent quarter-end.

DEFINITIONS

Indxx Global Internet of Things Thematic Index

The Indxx Global Internet of Things Thematic Index seeks to invest in companies that stand to potentially benefit from the broader adoption of the Internet of Things (IoT). This includes the development and manufacturing of semiconductors and sensors, integrated products and solutions, and applications serving smart grids, smart homes, connected cars, and the industrial internet.

Investing involves risk, including the possible loss of principal. The investable universe of companies in which SNSR may invest may be limited. The Fund invests in securities of companies engaged in Information Technology which can be affected by rapid product obsolescence, and intense industry competition. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. SNSR is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
