The total return of the Fund includes operating expenses that reduce returns, while the Index returns do not include expenses.

## INVESTMENT STRATEGIES

The D.F. Dent Small Cap Growth Fund (the "Fund") invests primarily in U.S. exchange-listed equity securities, including common, preferred and convertible stock, real estate investment trusts ("REITs"), American Depositary Receipts and exchange-traded funds that the Adviser believes possess superior long-term growth characteristics and have strong, sustainable earnings prospects and reasonably valued stock prices. The Fund may also invest in companies that do not have particularly strong earnings histories but do have other attributes that the Adviser believes may contribute to accelerated growth in the foreseeable future, including initial public offerings. Under normal market conditions, the Fund invests at least 80% of its net assets (plus borrowings for investment purposes) in equity securities with small market capitalizations ("80% Policy"). For these purposes, the Fund's Adviser considers small market capitalizations companies as those companies that, at the time of purchase, have market capitalizations within the range of companies included in the Russell 2000 Growth Index on a rolling three-year basis. As of September 30, 2022, the minimum and maximum market capitalizations on a rolling three-year basis within the Russell 2000 Growth Index were \$1 million and \$28.9 billion, respectively. Following a Fund's investment in a security, it may appreciate or depreciate significantly in value and result in the Fund holding securities with market capitalizations that differ significantly from the time of the Fund's investment.

## FUND MANAGEMENT

**Investing involves risks, including the possible loss of principal. The Fund invests in small size companies, which carry greater risk than is customarily associated with larger, more established companies. Investing in ADRs (American Depositary Receipt) carries risks of political and financial instability, less liquidity and greater volatility, as well as risks associated with the lack of reliable accounting and financial information. The Fund is also subject to other risks, such as REIT risk with possible real estate market declines, which are detailed in the Fund's prospectus. Geopolitical and similar disruptive events, including pandemics (such as COVID-19), may destabilize various countries' economies and markets, which may experience increased volatility and reduced liquidity.**

The Russell 2000 Growth Index measures the performance of the small-cap growth segment of the U.S. equity universe. It includes those Russell 2000 Growth Index companies with higher price-to-book ratios and higher forecasted growth values. One cannot invest directly in an index. Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Historically, some of the Fund's fees were waived or expenses reimbursed; otherwise, returns would have been lower. For the most recent month-end performance, please call 866.233.3368.
