\* The Advisor has contractually agreed for a period of 1 year from the date of the prospectus to waive all or a portion of its fee for the Fund (and to reimburse expenses to the extent necessary) in order to limit Fund total operating expenses to 1.25%. The total Annual Fund Operating Expense for WOGSX is 0.89%, as of the most recent prospectus.

^ Holdings are subject to change.

## FUND INVESTMENT STRATEGY

The White Oak Select Growth Fund seeks long-term capital appreciation and invests primarily in the common stocks of U.S. companies with large market capitalizations. White Oak is a dual-concentrated mutual fund, investing in a limited number of preferred sectors and typically holds 25 or fewer stocks. Although the Fund is diversified, its investment strategy involves overweighting positions from a narrow set of sectors that the portfolio managers believe hold the most growth potential.

## INVESTMENT APPROACH

The investment process begins with a top-down approach, analyzing key economic factors and identifying long-term trends. The managers then determine the sectors and industries with the best potential for long-term growth. Stock selection is based on both quantitative and qualitative factors, with the manager favoring companies which possess above-average growth potential at attractive prices. The investment team seeks to keep portfolio turnover low.

## FUND PERFORMANCE (as of December 31, 2022)

	Quarter	1 Year *	3 Year*	5 Year *	10 Year*
White Oak Select Growth Fund	6.67%	-25.72%	4.23%	6.85%	11.08%

### ABOUT THE ADVISOR

Oak Associates is an investment management firm located in Akron, Ohio. Founded in 1985 by Jim Oelschlager following his success managing the Firestone Company pension plan, Oak has spent the last 35 years focused on U.S equities and uncovering quality growth companies that can rise above market expectations. Throughout this time, Oak has remained committed to the same investment philosophy and process. Our firm invests with a long-term view and employs a fundamentally driven dual-concentrated approach, focusing on both sector and stock level growth opportunities. Unlike board indexes, our approach established meaningful positions in attractive companies only from select sectors. What we own is as important as what we do not own. In an increasingly short-term oriented investment environment, we believe investing for the long term better allows our clients to build wealth, and we are dedicated to discovering and investing in companies with the potential to grow over time and across market cycles.

**To determine if this fund is an appropriate investment for you, carefully consider the fund's investment objectives, risk factors, charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-888-462-5386 or visiting our website at [www.oakfunds.com](http://www.oakfunds.com). Please read it carefully before investing.**

**Important Risk Information.** Mutual fund investing involves risk, including the possible loss of principal. The value of the Fund's investments will vary from day to day in response to the activities of individual companies and general market and economic conditions. Due to the limited number of underlying investments, the Fund is more susceptible to the price movements of any one holding and thus may be more volatile than a more broadly diversified portfolio.

The S&P 500 Index is a commonly recognized, market capitalization weighted index of 500 widely held equity securities, designed to measure broad U.S. equity performance.

Morningstar Return determines an investment's excess return over the risk-free rate. Morningstar Risk assesses the variation in an investment's monthly returns with greater penalties for downside variation. Both are measured for three, five, and 10 years against other investments in the same Morningstar Category, and then the time periods are combined to produce an overall measure.

Large-cap core funds have more latitude in the companies in which they invest. These funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P 500 Index.

**Alpha** - Measure of risk-adjusted performance. **Beta** - A quantitative measure of the volatility of a given stock relative to the overall market. **R2** - A correlation measure between daily returns on the stock and the index's average returns. **Standard Deviation** - A measure of a security's stability over a given period of time. **Sharpe Ratio** - Measures risk-adjusted performance. **Active Share** - a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. **P/B Ratio** - Represents equity securities within the Fund's portfolio, and is not intended to demonstrate Fund growth, income earned by the Fund, or distributions made by the Fund. **P/E Ratio** - A valuation ratio of a company's current share price compared to its per-share earnings. **Turnover** - The number of shares traded for a period as a percentage of the total shares in a portfolio or of an exchange.
