

# HEARTLAND VALUE FUND

March 31, 2023

**“Buy not on optimism, but on arithmetic.”**

- Benjamin Graham

**Pursues long-term capital appreciation by investing in micro- and small-cap companies**

## DISTINGUISHING CHARACTERISTIC

The Heartland Value Fund seeks long-term capital appreciation by investing in undervalued micro and small cap stocks. The Fund utilizes Heartland's 10 Principles of Value Investing™ for stock analysis along with a collection of rules and tools designed to construct the overall portfolio such that stock selection is the primary driver of relative performance. This approach helps navigate the asset class and may increase the likelihood of potential outperformance relative to the Russell 2000® Value Index.

## HEARTLAND'S 10 PRINCIPLES OF VALUE INVESTING™

Low Price to Earnings	} Together, these Principles drive all buy and sell decisions	} Catalyst for Recognition
Low Price to Cash Flow		
Low Price to Book Value		
Value of the Company		
Capable Management and Insider Ownership		
Financial Soundness		
		Sound Business Strategy
		Positive Earnings Dynamics
		Positive Technical Analysis

**In the prospectus dated 5/1/2022, the Gross Fund Operating Expenses for the investor and institutional classes of the Value Fund are 1.04% and 0.92%, respectively. The Advisor has voluntarily agreed to waive fees and/or reimburse expenses with respect to the institutional class, to the extent necessary to maintain the institutional class' "Net Annual Operating Expenses" at a ratio not to exceed 0.99% of average daily net assets. This voluntary waiver/ reimbursement may be discontinued at any time. Without such waivers and/or reimbursements, total returns may have been lower.**

**Past performance does not guarantee future results. Performance represents past performance; current returns may be lower or higher. Performance for the institutional class shares prior to their initial offering is based on the performance of investor class shares. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. All returns reflect reinvested dividends and capital gains distributions, but do not reflect the deduction of taxes that an investor would pay on distributions or redemptions. Subject to certain exceptions, shares of a Fund redeemed or exchanged within 10 days of purchase are subject to a 2% redemption fee. Performance does not reflect this fee, which if deducted would reduce an individual's return. To obtain performance through the most recent month end, call 800-432-7856, or visit [heartlandadvisors.com](http://heartlandadvisors.com).**

Certain security valuations and forward estimates are based on Heartland Advisors' calculations. Certain outliers may be excluded. Any forecasts may not prove to be true. Economic predictions are based on estimates and are subject to change.

The members of the portfolio management team are registered representatives of ALPS Distributors, Inc.

## DEFINITIONS

**Active Share** is the percentage of a portfolio that differs from a benchmark index.

**Alpha** is an annual measure of a portfolio's return in excess of the market return, both adjusted for risk. It is a measure of the manager's contribution to performance due to security selection. A positive annual Alpha indicates that the portfolio outperformed the market on a risk-adjusted basis, and a negative annual Alpha indicates the portfolio did worse than the market.

**Beta** is a measure of the sensitivity of a portfolio's rates of return against those of the market. A Beta less than 1.00 indicates volatility less than that of the market.

**Information Ratio** of a manager series vs. a benchmark series is the quotient of the annualized excess return and the annualized standard deviation of excess return. The Information Ratio measures the consistency with which a manager beats a benchmark.

**Net Debt/Total Capital Ratio** of a stock is calculated as a company's interest-bearing liabilities minus cash or cash equivalents divided by its total capital, which is represented by the company's debt and shareholders' equity, and includes common stock, preferred stock, minority interest and net debt.

**R-Squared** is a statistical measure that represents the percentage of a fund or security's movements that can be explained by movements in a benchmark index.

**Sharpe Ratio** is the average return, less the risk-free return, divided by the standard deviation of return. The ratio measures the relationship of reward to risk in an investment strategy.

**Standard Deviation** is a measure of volatility of returns and is computed as the square root of the average squared deviation of the returns from the mean value of the return.

**Russell 2000® Value Index** measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth characteristics.

**Russell Investment Group** is the source and owner of the trademarks, service marks and copyrights related to the Russell Indices. Russell® is a trademark of Russell Investment Group.

All indices mentioned are unmanaged. It is not possible to invest directly in an index.

## INVESTMENT CONSIDERATIONS

The Value Fund invests primarily in small companies selected on a value basis. Such securities generally are more volatile and less liquid than those of larger companies. Value investments are subject to the risk that their intrinsic value may not be recognized by the broad market.

## INVESTMENT GOAL

The Value Fund seeks long-term capital appreciation through investing in small companies.
