INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term growth through a combination of capital appreciation and current income.

The fund primarily invests in stocks of real estate companies throughout the world, providing exposure in at least five different countries, including the United States.

BENEFITS AND RISKS

Changes in tax or zoning laws, overbuilding, environmental issues, changes in interest rates, the quality of property management (REITs), and other factors could hurt the fund.

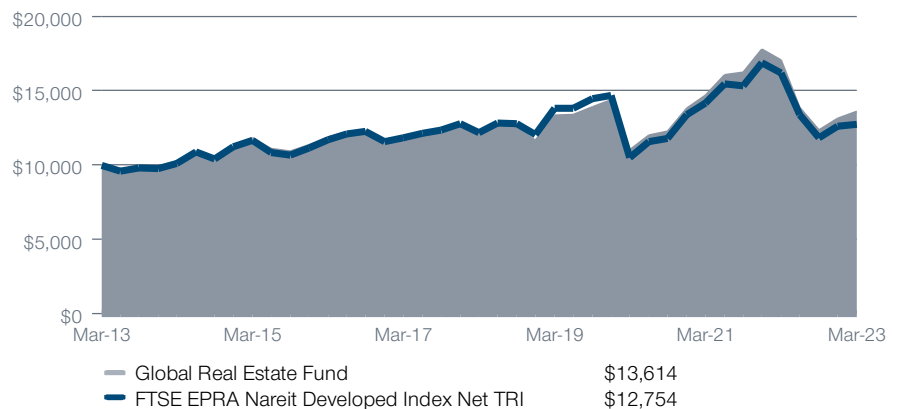

Real estate is affected by general economic conditions. When growth is slowing, demand for property decreases and prices may decline.

Rising interest rates, which drive up mortgage and financing costs, can restrain construction and buying and selling activity and may reduce the appeal of real estate investments.

Since the fund can invest substantially in foreign securities, it will also be subject to the risks inherent in non-U.S. issues.

CUMULATIVE RETURNS

Growth of \$10,000
