## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital appreciation through investments in common stocks of growth companies.

The fund focuses on companies having the following characteristics:

- Above-average growth in earnings and cash flow
- Ability to sustain earning momentum even during economic slowdowns
- Occupation of a lucrative niche in the economy and ability to expand even during times of slow economic growth

The fund will normally invest at least 80% of net assets in the common stocks of large companies.

## BENEFITS AND RISKS

Our investment approach reflects our belief that when a company increases its earnings faster than both inflation and the overall economy, the market will eventually reward it with a higher stock price.

As with all equity funds, this fund's share price can fall because of weakness in the broad market, a particular industry, or specific holdings.

## CUMULATIVE RETURNS

Growth of \$10,000

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
