¹ Returns for less than one year are not annualized.

² Includes maximum 5.75% front-end sales charge.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Performance data for all share classes current to the most recent month end may be obtained by calling 800 523-1918 or visiting delawarefunds.com/performance.

Total returns may reflect waivers and/or expense reimbursements by the manager and/or distributor for some or all periods shown. Performance would have been lower without such waivers and reimbursements.

Performance at NAV assumes that no front-end sales charge applied or the investment was not redeemed. Performance at offer assumes that a front-end sales charge applied to the extent applicable.

Sector allocation

| | Fund | Index |
|------------------------|-------|-------|
| Information technology | 33.4% | 40.4% |
| Healthcare | 20.3% | 12.2% |

Portfolio managers (years in industry)

| |
|---------------------------------|
| Bradley M. Klapmeyer, CFA (23) |
| Bradley D. Angermeier, CFA (18) |

The portfolio management team for the Fund changed effective December 5, 2022. Please read the latest prospectus, including the supplement dated December 5, 2022, for more information concerning this event. Because everyone's tax situation is unique, you should consult your tax professional about federal, state, local, or foreign tax consequences before making an investment in the Fund.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information can be found in the Fund's prospectus and summary prospectus, which may be obtained by visiting delawarefunds.com/literature or calling 800 523-1918. Investors should read the prospectus and summary prospectus carefully before investing.

Investing involves risk, including the possible loss of principal.

Investments in small and/or medium-sized companies typically exhibit greater risk and higher volatility than larger, more established companies. • Risk is increased in a concentrated portfolio since it holds a limited number of securities with each investment having a greater effect on the overall performance. • The disruptions caused by natural disasters, pandemics, or similar events could prevent the Fund from executing advantageous investment decisions in a timely manner and could negatively impact the Fund's ability to achieve its investment objective and the value of the Fund's investments.

P/E ratio is a valuation ratio of a company's current share price compared to its earnings per share. In this case, P/E is calculated using consensus forecasted earnings per share for the fiscal year following next. **Beta** measures the security's volatility in relation to its benchmark index.

Annualized standard deviation measures historical volatility of returns. **Active share** refers to the percentage of a fund's portfolio that differs from its benchmark, and is measured on a scale from 0% to 100%. The higher the

active share measurement, the lower the portfolio overlap with its benchmark.

Index performance returns do not reflect any management fees, transaction costs, or expenses. Indices are unmanaged and one cannot invest directly in an index. The **Russell 3000 Growth Index** measures the performance of the broad growth segment of the US equity universe. It includes those Russell 3000 companies with higher price-to-book ratios and higher forecasted growth values. The **Morningstar Large Growth Category** compares funds that invest primarily in big US companies that are projected to grow faster than other large-cap stocks. Growth is defined based on fast growth (high growth rates for earnings, sales, book value and cash flow) and high valuations (high price ratios and low dividend yields).
