Fund Performance as of March 31, 2023

Benchmark: MSCI EAFE

The performance data quoted represents past performance and is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For the most recent month-end performance please visit the Fund's website at bailliegifford.com/usmutualfunds.

The Baillie Gifford Fund's performance shown assumes reinvestment of dividend and capital gain distributions and is net of management fees and expenses. From time to time, certain fees and/or expenses have been voluntarily or contractually waived or reimbursed, which has resulted in higher returns. Without these waivers or reimbursements, the returns would have been lower. Voluntary waivers or reimbursements may be applied or discontinued at any time without notice. Only the Board of Trustees may modify or terminate contractual fee waivers or expense reimbursements. All fees are described in the Fund's prospectus.

Returns are based on the above noted share class from April 28, 2017. Prior to that date returns are calculated based on the oldest share class of the Fund adjusted to reflect the current share class fees where these fees are higher. *Not annualized.

Expense Ratios: All mutual funds have expense ratios which represent what shareholders pay for operating expenses and management fees. Expense ratios are expressed as an annualized percentage of a fund's average net assets paid out in expenses. Expense ratio information is as of the Fund's current prospectus, as revised and supplemented from time to time.

The MSCI EAFE Index is a free float-adjusted market capitalization weighted index that is designed to measure equity market performance in the global developed and emerging markets, excluding the United States. This unmanaged index does not reflect fees and expenses and is not available for direct investment. The Fund is more concentrated than the MSCI EAFE Index.

Investment Proposition

The Baillie Gifford EAFE Plus All Cap Fund aims to deliver good long-term performance to shareholders by investing in a portfolio of 60-90 international growth stocks, with up to 15% in Emerging Markets. The portfolio is built through bottom-up stock selection by the International All Cap Portfolio Construction Group. As active growth investors we differ from the benchmark, and look for businesses that seek to outperform the market over the long term. Portfolio guidelines ensure a level of diversification across sectors and regions.

Top Ten Holdings

Holdings	Fund %
1 Richemont	3.44
2 AIA	3.03
3 United Overseas Bank	2.98
4 ASML	2.85
5 Sartorius Group	2.83
6 Atlas Copco	2.80
7 TSMC	2.61
8 Mettler-Toledo	2.59
9 SMC	2.58

Beta is in comparison to MSCI EAFE Index.

Definitions

Active Share – A measure of the Fund's overlap with the benchmark. An active share of 100 indicates no overlap with the benchmark and an active share of zero indicates a portfolio that tracks the benchmark.

Annual Turnover – Turnover is calculated as the smaller figure of either purchases or sales for the month and dividing it by an average fund market value. Annual Turnover is calculated as the sum of the monthly turnover figures for the 12 month period.

Market Cap – The weighted average size of companies represented in the portfolio, denoted by market capitalization.

Price/Book – The weighted average ratio of current share price to last reported company book value per share. This represents a measure of valuation levels.

Price/Sales – The weighted average ratio of current share price divided by the 12 month forward sales per share. This represents a measure of valuation levels.

Earnings Growth – The weighted average growth in earnings per share of current portfolio holdings delivered over the past 5 years, expressed in % per annum. This represents a measure of delivered profits growth for the current holdings in the portfolio or benchmark.

Return on Equity – The weighted average ratio of 12 month forward earnings per share divided by the last reported book value per share. This represents a forward-looking measure of profitability, based on the current holdings of the portfolio or benchmark.

Beta – Beta is a measure of systematic risk, denoting the sensitivity of a fund to the direction of the market. Measures of beta that are significantly higher (lower) than 1.0 indicate a greater (lesser) degree of sensitivity to market direction.

Standard Deviation – A measure of the volatility of absolute returns. It is a measure of the dispersion of a set of absolute returns from its mean.

Important Information and Fund Risks

All information is sourced from Baillie Gifford & Co unless otherwise stated. All amounts are in US dollars unless otherwise stated.

As with all mutual funds, the value of an investment in the Fund could decline, so you could lose money. The most significant risks of an investment in the Baillie Gifford EAFE Plus All Cap Fund are Investment Style Risk, Growth Stock Risk, Long-Term Investment Strategy Risk, Non-U.S. Investment Risk, Emerging Markets Risk and Asia Risk. The Fund is managed on a bottom up basis and stock selection is likely to be the main driver of investment returns. Returns are unlikely to track the movements of the benchmark. The prices of growth stocks can be based largely on expectations of future earnings and can decline significantly in reaction to negative news. The Fund is managed on a long-term outlook, meaning that the Fund managers look for investments that they think will make returns over a number of years, rather than over shorter time periods. Non-U.S. securities are subject to additional risks, including less liquidity, increased volatility, less transparency, withholding or other taxes and increased vulnerability to adverse changes in local and global economic conditions. There can be less regulation and possible fluctuation in value due to adverse political conditions. Investing in emerging markets can involve additional market, credit, currency, liquidity, legal or political risks than investing in more developed markets. Some Asian securities may be less liquid than US or other foreign securities. They can be affected by high inflation, currency fluctuations, political instability and less efficient markets. Many Asian economies are dependent on international trade and only a few industries and can be badly affected by trade barriers. Other Fund risks include: China Risk, Conflicts of Interest Risk, Currency Risk, Equity Securities Risk, Environmental, Social and Governance Risk, Focused Investment Risk, Geographic Focus Risk, Government and Regulatory Risk, Information Technology Risk, Initial Public Offering Risk, Japan Risk, Large-Capitalization Securities Risk, Liquidity Risk, Market Disruption and Geopolitical Risk, Market Risk, Service Provider Risk, Settlement Risk, Small-and Medium-Capitalization Securities Risk and Valuation Risk.

For more information about these and other risks of an investment in the Fund, see "Principal Investment Risks" and "Additional Investment Strategies" in the prospectus. There can be no assurance that the Fund will achieve its investment objective.

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. This information and other information about the Fund can be found in the prospectus and summary prospectus. For a prospectus and summary prospectus, please visit our website at bailliegifford.com/usmutualfunds. Please carefully read the Fund's prospectus and related documents before investing.

The Fund is distributed by Baillie Gifford Funds Services, LLC.
