The data shown represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Please see [transamerica.com](https://transamerica.com) for performance data current to the most recent month-end. The investment return and principal value of mutual funds will fluctuate over time so that shares, when redeemed, may be worth more or less than their original cost. Net asset value (NAV) returns include reinvestment of dividends and capital gains but do not reflect the deduction of any sales charges. If a sales charge had been deducted, the results would have been lower. Performance for other share classes will vary.

The Max Sales Charge for Class A shares is 5.50%. There are no sales charges for Class I shares. Class I shares are primarily offered for investment to institutional investors including, but not limited to, fee-based programs, pension plans, and certain endowment plans and foundations. The minimum investment for Class I shares is \$1,000,000 per fund account, but will be waived for certain investors. There are no sales charges for Class R6. Class R shares are only available through eligible retirement accounts. R6 shares are additionally intended for purchase by participants in certain health savings plans and health savings accounts. There is no minimum investment for eligible plans investing in R6 shares.

Performance figures reflect any fee waivers and/or expense reimbursements by the Investment Manager. Without such waivers and/or reimbursements, the performance would be lower. Future waivers and/or reimbursements are at the discretion of the Investment Manager. Contractual arrangements, if any, have been made with Transamerica Asset Management, Inc. through 3/1/2024.

The MSCI EAFE Index is an unmanaged index used as a general measure of market performance. It is not possible to invest directly into an index. Calculations assume dividends and capital gains are reinvested and do not include any managerial expenses.

During periods of market disruption (e.g. COVID 19), which may trigger trading halts, the fund's exposure to the risks described in the prospectus will likely increase. As a result, the value and liquidity of the fund's investments may be negatively affected.

The price of equity securities fluctuates based on changes in a company's financial condition and overall market and economic conditions. If the market prices of the equity securities owned by the fund fall, the value of the fund will decline. Growth stocks typically are particularly sensitive to market movements and may involve larger price swings because their market prices tend to reflect future expectations. The prices of securities the sub-adviser believes are undervalued may not appreciate as anticipated or may go down. Investments in global/international markets involve risks not associated with U.S. markets, such as currency fluctuations, adverse social and political developments, and the relatively small size, lower market volumes and lesser liquidity of the markets. There also can be no assurance that the use of models will result in effective investment decisions for the fund.

Shares may be sold (or "redeemed") on any day the New York Stock Exchange is open for business. Proceeds from the redemption of shares will usually be sent to the redeeming shareholder within two business days after receipt in good order of a request for redemption. However, Transamerica Funds has the right to take up to seven days to pay redemption proceeds, and may postpone payment under certain circumstances, as authorized by law.

**Mutual funds are subject to market risk, including loss of principal. Past performance is not indicative of future results.**
