

# Large Cap Concentrated Fund

As of 31 Mar 2023

## DIAMOND HILL

INVESTED IN THE LONG RUN

### Team

**Chuck Bath, CFA**  
Portfolio Manager

**Austin Hawley, CFA**  
Portfolio Manager

**Brian Fontanella, CFA**  
Portfolio Specialist

### Tickers

**Investor: DHFAX**

**Class I: DHFIX**

**Class Y: DHFYX**

### Philosophy and Process Highlights

Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to invest at a discount to intrinsic value
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

### Portfolio Guidelines

- Typically 20 positions
- Maximum position size is 10%
- Top 10 holdings are typically greater than 50% of net assets
- Maximum industry exposure is 25%
- Maximum sector exposure is 35%

### Market Capitalization

Holdings are derived from holdings in the Diamond Hill Large Cap portfolio. The Large Cap Concentrated portfolio typically invests in companies with a market capitalization of \$15 billion or greater.

### Top Ten Equity Holdings<sup>1</sup>

|                                    | Sector              | % of Net Assets |

Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit [diamond-hill.com](http://diamond-hill.com). Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized.

| vs Russell 1000 Value Index | 104/117 |

## Calendar Year Returns (%)

|                          | 2022   |
|--------------------------|--------|
| Class I                  | -12.75 |
| Russell 1000 Index       | -19.13 |
| Russell 1000 Value Index | -7.54  |

**Risk disclosure:** Because the portfolio holds a limited number of securities, a decline in the value of these investments may affect overall performance to a greater degree than a less concentrated portfolio.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Russell 1000 Index measures the performance of roughly 1,000 US large-cap companies. The Russell 1000 Value Index measures the performance of US large-cap companies with lower price/book ratios and forecasted growth values. The indexes are unmanaged, market capitalization weighted, include net reinvested dividends, do not reflect fees or expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. See [diamond-hill.com/disclosures](http://diamond-hill.com/disclosures) for a full copy of the disclaimer.

<sup>5</sup> **Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the risk. Relative to the Russell 1000 Index. **Standard Deviation** measures the volatility of a portfolio's returns. **Beta** measures a portfolio's sensitivity to market movements. **Sharpe Ratio** is the measure of risk-adjusted return of an investment portfolio. **Alpha** is the excess return of an investment relative to the index's return. **R-squared** represents the percentage of a portfolio's movements that can be explained by general market movements. **Up/Down Capture Ratio** is used to evaluate how well a portfolio performed relative to an index during periods when that index has risen/dropped. Statistics for periods less than one year are not annualized.
