Performance returns assume the reinvestment of all distributions. Returns for periods less than one year are not annualized. Total returns reflect a contractual expense limitation for direct annual Fund expenses for all classes for certain periods since inception, without which returns would have been lower. Past index and category performance returns are not intended to serve as a proxy for future fund performance.

Share class	Expense ratios		Inception date
	Gross (%)	Net (%)	
Class A	1.32	1.26	05/31/2017
Institutional Service Class	1.13	1.07	05/31/2017

The 12b-1 fees listed below are already included in the gross and net fees. The maximum sales charge would be paid directly from your investment. Sales charges and 12b-1 Fees: Class A - max front end sales charge of 5.75%, 0.25% 12b-1 fee (investment size may reduce or eliminate front-end sales charge). Class C - 1.00% Contingent Deferred Sales Charge, 1.00% 12b-1 fee. Institutional Service Class - no sales charge, no 12b-1 fee.

The expense ratios are as shown in the most recent prospectus. The difference between gross and net operating expenses reflects contractual fee waivers and/or expense reimbursements in place through 02/29/2024. Please see the Fund's prospectus for more details.

Growth of \$10k (04/01/18-03/31/23)

DEFINITIONS: **Average annual total returns** are the annual compounded returns that would have produced the cumulative total return if fund performance had been constant during the given period. **P/E ratio** is the price of a stock divided by trailing 12-month earnings per share. **Sharpe ratio** measures excess return per unit of risk (standard deviation). A higher Sharpe ratio suggests better risk-adjusted performance. **Standard deviation** measures performance fluctuation, may not be indicative of future risk and is not a predictor of returns. **Alpha** represents the excess returns of a fund relative to its benchmark. A positive alpha is the added value an active manager has contributed over the benchmark returns. **Beta** measures volatility in relation to the fund's benchmark. A beta of less than 1.0 indicates lower volatility, while a beta of more than 1.0 indicates higher volatility relative to the benchmark. **R-Squared** measures the percentage of a fund's movements that can be explained by movements in a benchmark. **Turnover** measures how frequently investments are bought and sold within a fund during a 12 month period. The portfolio turnover rate is as of the fund's fiscal year end and is usually expressed as a percentage of the total value of a fund.

Call 800-848-0920 to request a summary prospectus and/or a prospectus, or download prospectuses at nationwide.com/mutual-funds-prospectuses.jsp. These prospectuses outline investment objectives, risks, fees, charges and expenses, and other information that you should read and consider carefully before investing.

KEY RISKS: The Fund is subject to the risks of investing in equity securities (including small and mid-size companies). Smaller companies are usually less stable in price and less liquid than larger, more established companies. Smaller companies are more vulnerable than larger companies to adverse business and economic developments and may have more limited resources. Therefore, they generally involve greater risk. The Fund also is subject to the risks of investing in foreign securities (which may be more volatile, harder to price and less liquid than U.S. securities). The Fund may hold larger positions in fewer securities and financial instruments than other funds; therefore a change in value of a single security or instrument may have a substantial impact on the Fund's value and total return. Growth funds may underperform other funds that use different investing styles. Funds that invest in a relatively small number of securities may be subject to greater volatility than a more diversified investment. Please refer to the most recent prospectus for more detailed information.

Russell 3000[®] Growth Index: A market capitalization weighted index based on the Russell 3000 index. The Russell 3000 Growth Index includes companies that display signs of above average growth. The index is used to provide a gauge of the performance of growth stocks in the U.S. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes.
