

# First Eagle Overseas Fund

## Growth of \$10,000 Since Inception

Results shown are since August 31, 1993. This chart illustrates a hypothetical \$10,000 investment in Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower.

## Average Annual Returns as of Mar 31, 2023

	YTD	1 Year	5 Years	10 Years	Since Inception	Expense Ratio <sup>1</sup>	Inception
First Eagle Overseas Fund Class A (SGOVX) w/o load	6.77	-0.54	3.26	4.31	9.26	1.15	Aug 31, 1993
First Eagle Overseas Fund Class A (SGOVX) w/ load	1.44	-5.50	2.20	3.77	9.06	1.15	Aug 31, 1993

## Allocation by Region<sup>7,8</sup>

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than their original cost. Past performance data through the most recent month end is available at [www.firsteagle.com](http://www.firsteagle.com) or by calling 800-334-2143. The average annual returns are historical and reflect changes in share price, reinvested dividends and are net of expenses. "With sales charge" performance for Class A Shares gives effect to the deduction of the maximum sales charge of 3.75% for periods prior to March 1, 2000, and of 5.00% thereafter. The average annual returns for Class C Shares reflect a CDSC (contingent deferred sales charge) of 1.00% in the year-to-date and first year only. Class I Shares require \$1MM minimum investment and are offered without sales charge. Class R6 Shares are offered without sales charge. Operating expenses reflect the Fund's total annual operating expenses for the share class as of the Fund's most current prospectus, including management fees and other expenses.

2. Alpha is a measure of the active return on an investment, the performance of that investment compared with a suitable market index.

3. Beta is a measure of the fund's volatility (risk) relative to the overall market. The higher the fund's Beta, the more the fund price is expected to change in response to a given change in the value of the market.

4. Standard deviation is a statistical measure of how returns over time have varied from the mean. A lower number signifies lower volatility.

5. Active share measures the percentage of a fund's portfolio holdings differing from its benchmark. Active share can range from 0% (index fund) to 100% (no commonality with the benchmark index).

6. Portfolio holdings are subject to change and should not be considered a recommendation to buy or sell securities. Current and future portfolio holdings are subject to risk. The Fund may invest in gold and precious metals through investment in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). Gold Bullion and commodities include the Fund's investment in the Subsidiary.

7. Percentages may not equal 100% due to rounding.

8. Short-Term, Cash & Cash Equivalents include short-term investments; e.g., short-term commercial paper (2.7% of net assets) that settles in 90 days or less, longer-term commercial paper (3.4% of net assets) that settles in 91 days or more, with the balance in US T-bills or money market funds.

9. Other includes: Government Bonds 1.9%, Communication Services 1.1%.

## 25 Year Risk vs. Return<sup>10</sup>

	Annualized Return	Annualized Standard Deviation
SGOVX	8.64%	11.64%
MSCI EAFE Index	4.26%	16.76%
MSCI World Index	5.79%	15.78%
S&P 500 Index	7.39%	15.64%

Results shown are since Mar 31, 1998. This chart illustrates risk and return data for Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower.

10. The MSCI World Index is a widely followed, unmanaged group of stocks from 23 developed market countries and is not available for purchase. The index provides total returns in US dollars with net dividends reinvested. The S&P 500 Index is a widely recognized unmanaged index including a representative sample of 500 leading companies in leading sectors of the US economy and is not available for purchase. Although the S&P 500 Index focuses on the large-cap segment of the market, with approximately 80% coverage of US equities, it is also considered a proxy for the total market. The S&P 500 Index includes dividends reinvested. One cannot invest directly in an index.

## Calendar Year Returns

2017	14.05%	25.03%	2009	20.64%	31.78%	2001	5.35%	-21.44%	1993 <sup>11</sup>	9.20%	-1.41%
2016	5.59%	1.00%	2008	-20.97%	-43.38%	2000	5.68%	-14.17%			
2015	2.27%	-0.81%	2007	8.39%	11.17%	1999	33.19%	26.96%			

11. 1993 performance is for the period August 31, 1993 to December 31, 1993.

Performance information is for Class A Shares without the effect of sales charges and assumes all distributions have been reinvested and if sales charge was included values would be lower. Past performance does not guarantee future results.

## Risk Disclosures

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

Investment in gold and gold related investments present certain risks, and returns on gold related investments have traditionally been more volatile than investments in broader equity or debt markets.

The principal risk of investing in value stocks is that the price of the security may not approach its anticipated value or may decline in value.

All investments involve the risk of loss of principal.

The MSCI EAFE Index is an unmanaged total return index, reported in US dollars, based on share prices and reinvested net dividends of approximately 1,100 companies from 21 developed market countries. One cannot invest directly in an index.
