The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Performance data current to the most recent month end may be obtained at [www.emeraldmutualfunds.com](http://www.emeraldmutualfunds.com). Investment performance reflects fee waivers in effect. ### PORTFOLIO MANAGEMENT

**David A. Volpe, CFA**

PORTFOLIO MANAGER

DEPUTY CIO

Experience: 32 Years

**Stephen L. Amsterdam**

PORTFOLIO MANAGER

SENIOR RESEARCH ANALYST

Experience: 31 Years

The Fund portfolio is managed by a veteran investment team with 63 years collective investment experience. As a result of an on-going comprehensive risk assessment process, the team seeks to control volatility by diversifying the Fund's portfolio among subgroups within each industry sector and seeks to minimize risk by unequally weighting the percentage ownership of companies held.

Diversification does not eliminate the risk of experiencing investment losses.

### OBJECTIVE

**The Fund seeks long-term growth through capital appreciation.**

The Fund can invest in companies from a wide range of industries and of various sizes, including investments in mid and small-size companies. The Adviser typically defines mid-size companies as those having a market capitalization equal to or less than that of the largest companies in the Russell MidCap® Growth Index, and small-size companies as those having a market capitalization equal to or less than that of the largest companies in the Russell 2000® Growth Index. The Russell 3000® Growth Index is an unmanaged index comprised of those Russell 3000® companies with higher price-to-book ratios and higher forecasted growth values. The Fund seeks companies with perceived leadership positions and competitive advantages. The portfolio is diversified across industry sectors and includes companies that do not receive significant coverage from other institutional investors.

Past performance does not guarantee future results, share prices will fluctuate and you may have a gain or loss when you redeem shares. Investing in smaller companies generally will present greater investment risks, including: greater price volatility, greater sensitivity to changing economic conditions and less liquidity than the securities of larger, more mature companies.
