

REASONS TO CONSIDER

Tax Efficient

Unlike traditional MLP funds, MLPX avoids fund level taxes by limiting direct MLP exposure and investing in similar entities, such as the General Partners of MLPs and other energy infrastructure corporations.

Midstream Exposure

MLPX invests in midstream infrastructure entities such as pipelines and storage facilities that have less sensitivity to energy prices.

High Income Potential

MLPX invests in MLPs and other energy infrastructure companies, which may result in above-average yields.

| Kinder Morgan Inc | 6.94% | Pembina Pipeline Corp | 4.38% |

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized.

DEFINITIONS

| | |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Solactive MLP & Energy Infrastructure Index | The Solactive MLP & Energy Infrastructure Index is intended to give investors a means of tracking the performance of MLPs and energy infrastructure corporations. Midstream energy infrastructure MLPs and corporations principally own and operate assets used in energy logistics, including, but not limited to, pipelines, storage facilities and other assets used in transporting, storing, gathering, and processing natural gas, natural gas liquids, crude oil or refined products. The index limits its exposure to partnerships in order to comply with applicable tax diversification rules. Securities must be publicly traded in the United States. The index is maintained by Solactive AG. |
|---------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Investing involves risk, including the possible loss of principal. Investments in securities of MLPs involve risk that differ from investments in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP. MLP common units and other equity securities can be affected by macro-economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment towards MLPs or the energy sector, changes in a particular issuer's financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of MLPs, generally measured in terms of distributable cash flow). The Fund invests in the energy industry, which entails significant risk and volatility. The Fund invests in small and mid-capitalization companies, which pose greater risks than large companies. The Fund also expects to pay distributions, which will be treated as a return of capital for tax purposes rather than from net profits and shareholders should not assume that the source of distributions is from the net profits of the Fund. Past distributions are not indicative of future distributions. There is no guarantee that dividends will be paid. The information provided is not intended for trading purposes, and should not be considered investment advice.

The Fund derives substantially all of its cash flow from investments in equity securities of MLPs. The amount of cash that the Fund will have available to pay or distribute to you depends entirely on the ability of the MLPs that the Fund owns to make distributions to their partners and the tax character of those distributions. Neither the Fund nor the Adviser has control over the actions of underlying MLPs. The amount of cash that each individual MLP can distribute to its partners will depend on the amount of cash it generates from operations, which will vary from quarter to quarter depending on factors affecting the energy infrastructure market generally. Available cash will also depend on the MLPs' level of operating costs (including incentive distributions to the general partner), level of capital expenditures, debt service requirements, acquisition costs (if any), fluctuations in working capital needs, and other factors. The MLP holdings of the Fund expect to generate significant investment income, and the Fund's investments may not distribute the expected or anticipated levels of cash, resulting in the risk that the Fund may not have the ability to make cash distributions as investors expect from MLP-focused investments.

This information is not intended to be individual or personalized investment or tax advice. Please consult a financial advisor or tax professional for more information regarding your tax situation. The Fund is required to distribute income and capital gains which may be taxable. Buying and selling shares will result in brokerage commissions and tax consequences. Shares are only available through brokerage accounts which may have minimum requirements. Only whole shares may be purchased. The information presented here is for informational purposes only. It was prepared on information and sources that we believe to be reliable, but we make no representations or guarantees as to the accuracy or the completeness of the information contained herein. MLPX is non-diversified.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
